Subject: DWPs and EPA permits - consultations

Hi Curtis –

As we move along on the various DWP projects, I wanted to reach out to confirm that USGC and MARAD will include EPA's air and water permit effects for consideration in the ESA and NHPA consultations. I know that these consultations will be completed as part of the overall environmental review process, but we wanted to make sure that the EPA permits are specifically considered so that we will not be required to do separate consultations. EPA would be willing to participate in the consultation, if necessary.

In addition, EPA typically offers government-to-government tribal consultation on our permits and will reach out to tribes pursuant to EPA's consultation policy. Do MARAD and USCG have similar policies? If so, then perhaps we can coordinate that effort as well. For now, do you know of any tribes have expressed interest in the TGTI or SPOT projects? Of have you identified tribes that may be interested?

We would be happy to chat with you about all of this if that would be helpful.

Thanks!
Tina
