Subject: Superfund Resource Analysis

All

Attached is the resource analysis that Russ developed from your workgroup discussions. Please take a look at those sections that relate to your programs (and any others if you have time) and get back to me (and Russ) with any corrections/edits by 10am Monday. I will incorporate into the document and pass on to SLT. SLT will be meeting Tuesday afternoon to begin the discussion of Superfund resources and this document will be critical to that discussion. Thank you all again for getting together and providing some options for a path forward for Superfund, and special thanks to Russ Leclerc for pulling your thoughts together in this summary. I hope this is the beginning of your continued discussion of resources and priorities for the Superfund Program.

Thanks again and stay tuned!

Sandy
