Jim, please edit or approve and return to me asap. Thanks.

Craft Turney Water Supply Corporation, Jacksonville, Texas
On October 3, Craft Turney notified TCEQ of a backflow incident impacting a small portion of the water system causing a fungicide to enter the water supply. A "do not use order" was issued for a limited number of customers but was later expanded as a precaution. Sampling results from October 5 and 6 are being evaluated. The EPA Lab in Houston is test samples collected on October 10 for Methylene bis-thiocyanate (MBT) analysis. Flushing continues throughout the distribution system in the affected plane. The region continues to work closely with TCEQ on monitoring the resolution of this situation.
