Subject: CFAC Phase I SAP Modifications for 2017 Summer Scopes of Work

Good Morning Mike,

As we discussed when we were together in April, CFAC and Roux would like to perform some additional field work this summer at the CFAC Site. Attached to this email is the following materials that describe the proposed work:

- Phase I SAP Mod #10 - Asbestos landfill soil sampling and associated attachments (Sample location map, SOP, and revised SAP table)
- Phase I SAP Mod #11 – Pneumatic slug testing and associated attachments (SOP)

The proposed schedule for the summer would be as follows:

- 4th round of gw/sw sampling – June 12 through approximately June 30
- Pneumatic slug testing – July 6 through approximately July 28
- Asbestos soil sampling – July 31 through approximately August 11

Please let us know if you need any additional information or have any questions. If you agree with the proposed scope, please provide your concurrence on the modification requests. Thank you.
