Subject:	RE: GAF follow up - Singleton United call 11/15
Date:	Tuesday, November 23, 2021 7:02:56 AM

Janie,

I sent you an FTP link to submit the files. Our email system does not allow zip files. I will share the files with others here.

Have a wonderful Thanksgiving!

Thanks,
Aimee

Subject: Re: GAF follow up - Singleton United call 11/15

Hello David,

Thank you and your team for making the time to listen to our concerns. We hope our testimonials and the data/evidence we presented conveys the severity of the need to remove GAF, the biggest polluter from West Dallas, and how your agency plays a critical role in our fight for environmental justice.

We did indeed receive the file transfer from Aimee and Jon. THANK YOU!

I have attached a zip folder containing the compliance evidence we displayed as part of our presentation. However there is one pdf document that is over 62 MB. I have uploaded the document here in our Google Drive. Let me know if you are not able to access it for download. If not, please set up a FTP link so I can transmit the file.

Thank you for also providing the info on the corrections method. Your email mentioned attached slides but those did not come through. Would you mind resending?

We feel very fortunate to have gotten a chance to speak with you on 11/15. We sincerely appreciate your time and attention. I have relayed your thanks to our team and our elected officials as well.

We look forward to our continued collaboration fighting for clean air in West Dallas.

Wishing you all a lovely Thanksgiving holiday!

With gratitude and appreciation,
Janie on behalf of
Singleton United/Unidos

> Thank you, Singleton United and representatives, for meeting with us via Teams on November 15th and for presenting your concerns on the GAF facility. Please pass along our thanks to everyone who participated on your end.
>
> As a follow up to the call, it was mentioned during the call that algorithm correction methods are available for U.S. wide ambient conditions and not just for the western U.S. for wildfires. Here's a scientific article on published corrections to use when collecting PM2.5 data using Purple Air Sensors:
>
>> The US-wide correction is published here: https://doi.org/10.5194/amt-14-4617-2021
>> At high concentration (~>200 ug/m3) the correction becomes nonlinear and we use a quadradic (PA^2) equation. See attached slides (cleared for public presentation) with the most up to date correction with a transition zone between the equations.
>
> In addition, Mr. Jim Schermbeck mentioned not being able to find historical Title V and NSR files because some were created before the digital era. Our Air Permits Program has confirmed that we have digital files from the state's central electronic file room, some as far back as 40 years. Aimee Wilson and Jon Ehrhardt sent the files via FTP link, given the sheer volume. Aimee transmitted the NSR files (over 150 files) and Jon the Title V files (over 100 files).
>
> On the Requests & Questions that you submitted, we are reviewing those with the appropriate Program Offices and plan to respond holistically given the ongoing permit process. We will certainly notify you once we receive the state's response to public comments on the title V permit and the start of our 45 day review period.
>
> A friendly reminder, please share your compliance and monitoring data that you had presented on the call. Please let us know if you need assistance on sending that electronically to us. We can send you an FTP link to transmit the data if the files are larger than 10MB.

Thank you again for meeting with us, and we will continue to stay in touch.
