Keith –

Apologies for the delay in responding. You said the files had been converted from .tiff to .png and re-uploaded? We had Sam check yesterday, and we're not seeing them on our end.

Other than the log images, we don't have any other requests/concerns at this point. We look forward to seeing the rest of the modules submitted to both the GSDT and OneDrive folder and continuing review of your application. If we come across anything for which we need additional information, clarification, etc., we'll definitely reach out.

I've cc'd the other members of my team who will be reviewing your company's application along with Ken, our section chief. Feel free to reach out to all of us if you have any other questions or concerns!

Thank you!

Subject: Site Characterization, Rapides Parish

Good afternoon Brandon,

Quick note to ask if any additional early requests are needed. We have updated the tiff images to the requested png file format. We are diligently working to complete the remaining requirements where submission can be completed. We understand workload and have an internal goal to do our very best to complete accurately and succinctly the requirements for administrative filing. Our sites are focused geographically within Region 6 so our relationship will have significant longevity.
Thanks for all your help and insight.

Keith
