I don't recall making that request, if I'm the Cheryl you were referring to. The scope was determined by ECAD and changed several times without my input. My understanding was that we were targeting companies for which a referral was in process or targeted to support the referral, not already referred matters.

> Re: the timing for completing the reviews of the videos and contractor observations: we can expedite the review of the Apache videos once we complete the initial review of the contractor's report. The team has divided up with videos by date and is confirming site IDs by looking at signage at the start of the video, TCEQ or NMED permit info (where avail.), and occasionally Google maps. Once all videos are allocated to each company, we can pull together the Apache info. (total no. of sites, no. of new sites, no. of repeat sites, no. of super emitter sites). I think we should have Apache info. ready to share around the beginning of November.
