Given the situation with both the NPS plan not yet submitted and the OR CZARA situation, it is not urgent.

Ok Jill. I will focus my review on the project sections and the prioritization/key actions on 13-15. Is there a timeline for getting this done?

Hi Alan,

I'll be writing up the letter once we get the NPS plan part figured out, so if you care to (and don't feel like you have to) review the project sections of the annual review, and perhaps the prioritization/key actions sections on pages 13-15, that would be great. I would just skim them to see if there is anything that seems out of line to you, either weird priorities, or something missing, or just to see if their description of the projects sounds legit, that would be great. I'll look more closely at how the money is being spent, etc. Thanks.

jill

If I print two of these I will have bookends for my books in my library. Is there a section(s) we should focus on?

Subject: 2014 NPS ODEQ Annual Report

Jill, greetings

Hope you are doing well.

Please accept ODEQ's **Oregon Nonpoint Source Pollution Program 2014 Annual Report.**

The report meets the requirements of section 319 (h) (8) and (11) of the Federal Clean Water Act (CWA) (33 USC 1329). It documents the activities and accomplishments of the State of Oregon in general and the Oregon DEQ in particular regarding the administration of the State's NPS Program during the period January – December 2014. Oregon revised its NPS Control Program Plan following EPA's guidance that became available in 2014.

The report represents a strong network of federal, state and local partners finding common ground in stewardship. Many hours were spent capturing the hard work in planning and implementing the NPS program.

It is our understanding that the Annual Report and the Oregon 319 request for funding goes hand in hand.

Please let me know if you have comments, or if I could provide additional information.

Ivan Camacho
