Well Completion and Recompletion Report

(Instructions: See Reverse Side)

Notice: This form must be completed and filed prior to allowable being granted.

WELL DESCRIPTION

Field: Agnes Road North
Name of Operator: O'Brien Operating Co.
Pool Completed In: Cotton Valley
Lease Name: John Parnell No. 2
Address: Street: P.O. Box 6020
Exact Location: 1000' FWL & 2000' FNL
City: Shreveport
Sec. 13 Twp. 17S Rge. 16W
County: Union
State: LA 71136-6020
Date Commenced: 10-8-90
Date Completed: 10-26-90
Elevation: 252.8
Total Depth Drilled: 6001
Electric Log Run: Yes X No
Electric Log Filed: Yes X No

CASING, TUBING, PERFORATING AND COMPLETION PROGRAM USED IN WELL

Conductor: (Size & Wt.) None set at ft. w/ sks.
Surface: (Size & Wt.) 8-5/8 24# set at 762 ft. w/ 350 sks.
Intermediate: (Size & Wt.) None set at ft w/ sks.
Production: (Size & Wt.) 5-1/2 17# set at 5730 ft. w/ 665 sks.
Tubing: (Size & Wt.) 2-7/8" set at 5418 ft.
Peforations: Size 0.4 No. Per Foot 4
Peforated Intervals: 5533-42

Acidized: Yes No X; Interval w/ gals.
Fractured: Yes No X; Interval w/ lbs.
of sand; bbls. of oil.

LEASE DATA

1. Number of wells located on this lease, including this well 2
2. Tank battery to which this well is connected: Existing New X
3. Liquid production from this well is sold to (Enron Oil Trading & Transportation
(Address 1400 Smith St., Houston, TX 77002
4. Disposition of gas from this well: Vented X Fuel Sold

RE: Parnell 1, PN 33912
Parnell 2 SWD, PN 34337
Agnes Road North Field
Union County, AR

Dear Mr. Looney,

In response to your letter of February 25, 2020, in regards to the two Parnell Wells, on the Parnell King Place, I have no plans to attempt to put these wells into production. I would like your permission to have both of these wells plugged, equipment removed and the location restored, by mid-summer.

At the present time, I believe I would do more damage to the road and locations attempting this work. I just need a season of dryer weather. If you have any questions feel free to contact me at 870-310-2620.

Sincerely,

Steve Rogers

Re: John Parnell #2 SWD
Sec. 13-17S-16W
Agnes Road North Field
Union County, AR

Gentlemen:

Your application filed for authority to dispose of produced salt water into the referenced well has been reviewed and appears to meet the necessary requirements of the state. Please consider this letter as your authority to use the referenced well for disposal of produced water only, and in accordance with the provisions of the application as filed. Disposal shall be down the tubing string with a packer set immediately above the disposal zone as approved. Provisions to monitor the annulus between the tubing and casing strings shall also be required.

Only water from the applied for and approved wells shall be authorized for disposal in the above referenced SWD well and pressures and volumes shall comply with the application as filed.

It is requested that upon completion of the referenced salt water disposal that this office be notified for inspection and running of a mechanical integrity test on the referenced well. Additionally, monthly disposal reports (AOGC-14) shall be required; whereas, both annulus pressure and injection pressure are shown. Further, a completion report shall be filed indicating the perforated interval and tubing and packer settings.

Yours very truly,

Martin T. Perdue

rev. 3/17/89

APPLICATION TO INJECT SALT WATER/ENHANCED RECOVERY FLUID

Arkansas Oil & Gas Commission
2215 West Hillsboro
P.O. Box 1472
El Dorado, AR 71731-1472

Arkansas Department of Pollution
Control and Ecology
P.O. Box 851
El Dorado, AR 71731-0851

Note: In an effort to reduce the amount of paperwork necessary to permit a Salt Water Injection System both regulatory agencies involved have combined their applications. Upon completion of this form send a copy to each agency listed above. Any modifications, alterations, additions or changes in the permitted system, well connected thereto, and quantities of salt water injected will require permit revision by both the ADPC&E and the AO&GC. Both regulatory agencies must be notified in writing, and approval granted before modifications can be enacted. All applications for disposal of oil field wastes by other than injection wells shall be submitted to the ADPC&E's office in Little Rock.

PERMIT FEES--ARKANSAS DEPARTMENT OF POLLUTION CONTROL AND ECOLOGY
In accordance with Act 817 of 1983 and regulations promulgated thereto, a fee is required to be paid by the applicant prior to the issuance, modification, or renewal/reissuance of a permit. In addition, the permittee will be assessed an annual review fee in accordance with the permit fee regulations. The purpose of the permit fees is to help defray the administrative cost of issuance, renewal, inspection, modification, and monitoring associated with these permits. The initial permit application fee for salt water injection permits is $150.00, and should be submitted along with the permit application. This fee is payable by cash, check or money order and must be received by the Department of Pollution Control and Ecology before the permit can be issued.

PERMIT FEES--ARKANSAS OIL AND GAS COMMISSION
In accordance with Order Reference Number 185-84 a fee on one hundred dollars ($100.00) is required to be submitted with each application. In addition to the application fee a non-transferrable fee of one hundred dollars ($100.00) per injection/enhanced recovery well per year is required to be paid to the Arkansas Oil and Gas Commission by July 1 of each year.

OWNER/OPERATOR O'Brien Operating Company

STREET P.O. Box 6020

CITY Shreveport STATE LA ZIP 71136-6020

A list of the names, addresses and telephone numbers of supervisory and field personnel responsible for the disposal system.

John Rogers 1005 Palm Dr. El Dorado, AR 71730 501/863-8623

I. This application is for approval to inject (X) Produced Salt Water ( ) Enhanced Recovery Fluid into the (Zone) Cotton Valley of the Agnes Road North Field, at a depth interval of 4570 to 4635 feet SUB-SURFACE in the system known as the John Parnell No. 2 at a location described as being 1000' FWL & 2000' FNL of Section 13 Township 17S Range 16W of Union County, Arkansas. The nearest city/town is El Dorado, AR

It is proposed to begin disposal operations on or about August 15, 1991.

The estimated cost of the facilities is $ 20,000.

RECEIVED
JUL 19 1991
ARKANSAS OIL & GAS COMMISSION

This application is being filed under the requirements of Rule C-7 (C-7, C-8, or C-9 indicate which) of the General Rules and Regulations of the Arkansas Oil and Gas Commission.

C-7 If there is NO production within a 1/2 mile radius of the proposed inject well in the proposed injection zone.
C-8 If there IS production within a 1/2 mile radius of the proposed injection well in the proposed injection zone.
C-9 Using gas to maintain or repressure a reservoir.

II. (Complete either (A) or (B) as applicable.) See Attachment for construction requirements.

A. (X) This well is a COMPLETED well and will be converted to injection service; it is cased and cemented as indicated below:

(SIZE) 8-5/8 Surface Casing set at 762 feet with 350 sacks.

(SIZE) 5-1/2 Production Casing set at 5730 feet with 665 sacks.

(SIZE) 2-7/8 Injection Tubing set at 4470 feet with PACKER set at 4473 feet.
(Note: All injection wells must have tubing and a packer or other installation to protect the casing. The packer can be set no higher than 100 feet above injection interval.)

All available logs are enclosed: (X) Yes ( ) No

Hole/bit size is 7-7/8 inches. Total depth of the well is 6001 feet.

B. ( ) This well WILL BE DRILLED for injection service and a regular fee drilling application will be submitted. We plan to case and cement the well as indicated below:

(SIZE) _____ Surface Casing set at _____ feet with _____ sacks.

(SIZE) _____ Production Casing set at _____ feet with _____ sacks.

(SIZE) _____ Injection Tubing set at _____ feet with Packer set at _____ feet.
(Note: All injection wells must have tubing and a packer or other installation to protect the casing. The packer can be set no higher than 100 feet above injection interval.)

Hole/Bit size proposed is _____ inches. Total depth of well proposed is _____ feet.

III. Each of the operators listed below owning leases within the one-half (1/2) mile radius of the proposed injection well have received a copy of this application by certified mail and copies of the return receipts have been attached to this application as proof thereof.

LEASE	OPERATOR	ADDRESS
None	No Offset Operators

JUL 19 1991
ARKANSAS OIL & GAS COMMISSION

(If additional space is needed, attach a separate sheet.)

IV. A plat is attached which indicates the location of the proposed injection well with distances to nearest lease lines. Also shown on the plat are all wells of public record and fresh water wells of public record within a one-half (1/2) mile radius from the proposed injection well. A separate list of all wells which have penetrated the injection zone is included to indicate: (Information submitted MUST agree with AOGC records.)

1. Exact Legal Location
2. Current Operator
3. Lease Name
4. Name of Zone Currently Completed
5. Perforated Intervals
6. Total Depth
7. Drilling Date
8. Cementing Records
9. Record of Completion/Plugging
10. Current Status-Specify
    a. Producing
    b. Shut In
    c. Injection (disposal or enhanced rec.)
    d. Municipal Water Supply
    e. Permanently Abandoned
    f. Specify Other Status

V. A schematic drawing of the sub-surface installation is attached to show casing, approximate top and bottom of cement, tubing, packers, perforations, and well head of the injection well. Equipment must be installed and used to assure that injection will be confined to the proposed injection zone.

VI. A record of injection well stimulation is listed: (Indicate if no stimulation attempted.)

DATE	STIMULATION	RESULTS

(If additional space is needed, attach a separate sheet.)

VII. A sign will be maintained at the well site to indicate the operator, well name, well number and location description.

VIII. To insure mechanical integrity of the injection well an initial mechanical integrity test and periodic tests at intervals not greater than once every five (5) years will be conducted to confirm that the packer and tubing are containing the injection fluids. To facilitate pressure testing of each casing annulus, a valve and standard one-half (1/2) inch female connection to receive a pressure gauge must be maintained at the well head.

IX. Within fifteen (15) days after completion of the well, a completion report, well logs, and injectivity test performed on the well, which were not previously filed, will be filed with the Oil and Gas Commission.

X. The Oil and Gas Commission will be notified in writing before the beginning of injection to allow inspection of the well and conduct the initial mechanical integrity testing.

XI. Attached is evidence of financial responsibility to plug and abandon the disposal/enhanced recovery well or wells by the method and procedure required by the Oil and Gas Commission. If required by the Commission, a bond of an amount not to exceed one hundred thousand ($100,000) dollars will be furnished to provide for adequate plugging of the injection well or wells.

XII. Attached is a notarized copy of the proof of publication of this application as it ran in one (1) publication in a legal newspaper having a general circulation in the county or in each county, if there shall be more than one, in which the lands embraced within the application are situated, and by mailing or delivering a copy of the application to each operator of producing or drilling wells within a one-half (1/2) mile radius of the injection well. Such notice shall be published, mailed or delivered at least ten (10) days, but not more than thirty (30) days, prior to the date on which the application is mailed or filed with the Commission.

For information on how to complete Sections XIII through XVIII, please refer to ADPC&E's Guide for SWD Applications. This guide is available from the El Dorado office.

XIII. Produced salt water to be injected in this well will be received from the following wells:

XIV. A. The estimated maximum amounts of produced salt water to be injected are 350 barrels per day. NO other fluid or product may be injected into the proposed injection well without prior permission of the appropriate regulatory agency.

B. The maximum injection pressure at the injection well head will be less than 0.5 pig for each foot of sub-surface depth to the injection zone. An exception for this maximum pressure may be granted if the applicant presents sufficient evidence to justify the exception. The injection pressure shall be limited to that pressure which will not fracture the confining beds of the proposed injection zone, or cause movement of injection or formation fluids into fresh water zones. Estimated injection pressure is 750 psig. The actual volumes of salt water injected and well head pressure will be reported monthly on AOGC Form 14.

XV. A description of the method to be used for monitoring disposal system flows and pressures is to be included. This should contain a description of how such flow rates and pressures can be verified or checked for accuracy.

XVI. A drawing is attached showing the locations of the items below. The scale of the drawings should be clearly indicated and the approximate direct distance between producing wells and disposal wells specified on the drawing.

1. Connected
2. Holding Tanks (Show size)
3. Tank Batteries
4. Treaters, Gunbarrels
5. Piping (Show size and materials)
6. Separators
7. Pumps
8. Production Cut-Off Switches
9. Emergency Storage Facilities (Show length, depth, width or tank size in Bbls.)

(NOTE: See ADPC&E Guide for information on storage facilities.)

XVII. HOLDING TANK REQUIREMENTS FOR TRANSFER STATIONS
(See terminology list at end of Section XVIII for meanings of abbreviations.)

A. For DTV/DIV 0.4

1. If salt water can be transferred to the Main Disposal Station without the addition of mechanical head (pumps):

   a. MSR=100 BBL, or
   b. MSR=DTV (If DTV is 100 BBL/Day)

2. If salt water cannot be transferred to the Main Disposal Station without the addition of mechanical head (pumps):

   a. Automatic cut-off switches to producing wells connected to the Transfer Station are required. The cut-off switch must be situated on the Transfer Station salt water storage vessel to provide a storage capacity of equal to DTV/24 (BBLS.) above the cut-off level, or;
   b. MSR=DTV/4 (BBLS.) with a minimum storage capacity of 100 BBLS, or DTV (if DTV is 100 BBLS/Day.)

B. For DTV/DIV 0.4

1. Automatic cut-off switches to producing wells connected to the Transfer Station are required. The cut-off switch must be situated on the Transfer Station salt water storage vessel to provide storage capacity equal to DTV/24 (BBLS) above the cut-off level, or;

2. MSR=DTV/2 (BBLS) with a minimum storage capacity of 100 BBLS or DTV (if DTV is 100 BBLS/Day.)

C. If the Transfer Station is not connected to the Main Disposal Station by pipeline, i.e. salt water must be transported by truck, MSR=3 DTV (BBLS)

D. The Transfer Station salt water storage vessels shall be surrounded by an impermeable dike or firewall with a capacity equal to 1.5 times the volume of the largest vessel contained within the walls.

E. Any alternate system or design which meets the approval of the ADPC&E.

XVIII. HOLDING TANK REQUIREMENTS FOR MAIN DISPOSAL STATIONS

A. For IP/MP 0.4

1. If salt water can be disposed into the disposal well without the addition of mechanical head (pumps):

   a. MSR=100 BBLS, or;
   b. MSR=DIV if DIV 100 BBLS/Day

RECEIVED
JUL 19 1991
ARKANSAS OIL & GAS COMMISSION

2. If salt water cannot be disposed into the disposal well without the addition of mechanical head (pumps):

   a. Automatic cut-off switches to producing wells connected to the Main Disposal Station are required. The cut-off switch must be situated on the Main Disposal Station salt water storage vessel to provide a storage capacity equal to DIV/24 (BBLS) above the cut-off level, or;

   b. MSR=DIV/2 with a minimum storage capacity of 100 BBLS, or DIV (if DIV 100 BBLS/Day).

B. For IP/MP 0.4

   1. Automatic cut-off switches to producing wells connected to the Main Disposal Station are required. The cut-off switch must be situated on the Main Disposal Station storage vessel to provide a storage capacity equal to DIV/24 (BBLS) above the cut-off level, or;

   2. MSR=DIV/2 with a minimum storage capacity of 100 BBLS, or DIV (if DIV is 100 BBLS/Day).

C. The Main Disposal Station salt water storage vessels shall be surrounded by an impermeable dike or firewall with a capacity of 1.5 times the volume of the largest vessel contained within the walls.

D. Any alternative system or design which meet the approval of the ADPC&E.

TERMINOLOGY

D--Sub-surface depth to the top of the injection one as listed in Section I of the permit application.

DIV--Estimated maximum amounts of salt water to be injected daily as reported in Section XIV (A) of the permit application (BBLS.).

DTV--Amounts of salt water transferred daily from production separators to the Transfer station. (BBLS)

IP--Estimated injection pressure as listed in Section XIV (B) of the permit application (psig). If this pressure is less than or equal to 1 psig, a value of 1 psig shall be used in the calculation of the minimum required storage.

Main Disposal Station--The site, in the construction and operation of a SWD system, utilized for the final collection and storage of produced salt water prior to the disposal by sub-surface injection.

MP--Maximum allowable well head pressure, equal to 0.5 psi per foot of sub-surface depth to the injection zone (0.5 D, psig)

MSR--Minimum required storage, as calculated by the appropriate formula (BBLS)

Transfer Station--A site shall be considered a Transfer Station if produced salt water cannot be transferred directly to the Main Disposal Station from the production separator, i.e. a salt water storage vessel is connected at the site.

-- Less than

-- Greater than or equal to

XIX. A copy of the Spill Prevention Control and Countermeasures (SPCC) plan for this system must be available for inspection upon request.

ARKANSAS OIL AND GAS COMMISSION
El Dorado, Arkansas

PLUGGING RECORD

(Within five days after the plugging of any well has been accomplished, the owner or operator thereof shall file this form with the Commission, setting forth in detail the method used in plugging the well.)

PLUGGING METHODS AND PROCEDURE—The methods and procedure for plugging a well shall be as follows: (a) The bottom of the hole shall be filled to the top of each producing formation, or a bridge shall be placed at the top of each producing formation, and in either event a cement plug not less than 15 feet in length shall be placed immediately above each producing formation whenever possible.

(b) A cement plug not less than 15 feet in length shall be placed at approximately 50 feet below all fresh water-bearing strata.

(c) A plug shall be placed at the surface of the ground in each hole plugged in such manner as not to interfere with soil cultivation.

(d) The interval between plugs shall be filled with an approved heavy mud-laden fluid.

(e) An uncased rotary drilled hole shall be plugged with approved heavy mud up to the base of the surface string at which point a plug of not less than 15 feet of cement shall be placed. The hole shall also be capped similar to other abandoned holes.

(f) The operator shall have the option as to the method of placing cement in the hole by (1) dump bailer (2) pumping through tubing (3) pump and plug, or (4) other method approved by the Commission.

d. Facility name and location. (Location should be described in Latitude and Longitude to the nearest 15 seconds, or alternatively, provide the legal description in Section, Range, and Township):

Name of Facility: _____

Latitude: ___ deg. ___ ' ___ " North

Longitude: ___ deg. ___ ' ___ " West

or

Section ___ Township ___ Range ___

Spot ___ /4 ___ /4 Field: Agnes Road North Field

Nearest City/Town ElDorado County Union

e. Provide a list below of all wells from which salt water is received for disposal, including estimated volumes (in barrels per day) from each:

Well Identification		Volumes
Operator	Lease/Well Name	
John C. Rogers	Parnell #1	400 BPD

(Use additional sheets as necessary)

f. Provide salt water storage tank capacity (in barrels) at each transfer and disposal site:

Name of Site	Storage Capacity
Parnell #1 Lease Location for Both	1-400 Barrel Tank 1-350 Barrel Tank

(Use additional sheets, if required)

g. Provide the above ground storage capacity (in barrels) at the injection site:

750 barrels

h. Projected (or actual) disposal rate (barrels per day):

400 barrels per day

i. Provide the injection formation(s) and intervals (this information is being requested for informational purposes only):

Formation Name	Intervals

(Use additional sheets, if necessary)

j. Is a copy of the AO&GC Letter of Authorization to construct and/or operate the SWD enclosed with this NOI?

____ Yes ✓ No

k. Has the owner/operator previously submitted, or have on file with the Department, a complete "Disclosure Statement" as required by Act 454 of 1991?

Yes X Date Submitted 10-12-95 Division _____

No _____

If the answer is "No", a non-exempted owner/operator must complete and submit the "Disclosure Statement" included with this NOI. Additional copies of the Disclosure Form may be obtained from ADPCE.

l. Is this applicant a corporation? ____ Yes X No

If "Yes", the owner/operator, by signature in Section 3 below, certifies that the corporation is registered with the Secretary of State of Arkansas.

m. Is this facility a new or proposed facility?

____ Yes X No

If "Yes", the applicant must also submit the following additional documents for ADPCE review:

(1) A schematic diagram of the proposed disposal system, including:

(i) connected wells
(ii) tanks (type and sizes)
(iii) treaters, gunbarrels, separators;
(iv) pumps
(v) cut-off switches
(vi) emergency storage (firewalls) dimensions
(vii) piping (sizes and materials)

(2) A topographic map or county highway map describing and/or illustrating the location of the disposal system.

RECEIVED
95 NOV -2 AM 10 25

n. For modifications to existing facilities, briefly describe the changes being requested (i.e., install 2 storage tanks, close out reserve pit, etc.)

NONE

2. Cognizant Official (Duly Authorized Representative)

a. All reports required by the permit, or other information requested by the Director, shall be signed by the applicant (or person authorized by the applicant) or by a duly authorized representative of that person. A person is a duly authorized representative only if:

(1) the authorization is made in writing by the applicant (or person authorized by the applicant);

(2) the authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity such as the position of plant manager, superintendent, position of equal responsibility, or an individual or position having overall responsibility for environmental matters for the company.

(3) the authorization is submitted to the Director.

b. The applicant hereby designates the following person as cognizant official, or duly authorized representative, for signing reports required by the permit, and other information requested by the Director:

JOHN ROGERS — Name

OWNER/OPERATOR — Title

By signature in Section 3 below, the applicant certifies that the above named individual is qualified to act as a duly authorized representative. (NOTE: If no duly authorized representative is designated herein, the Department considers the applicant to be the cognizant official for the facility and only reports signed by the applicant will be accepted by the Department)

3. Certification and Signatory Requirements:

a. Signature on Application (Notice of Intent): The application or Notice of Intent must be signed below by a person authorized under the provisions of state law. Applicants should be familiar with the provisions regarding signatory authority which are included in the general permit in Section II.D.8.

b. Certification: The applicant and any person signing a document required under this permit must make the following certification:

" I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

PROCEDURES AND REQUIREMENTS FOR SURFACE CASING AND THE PLUGGING OF WELLS

You are REQUIRED to set a minimum of 750 feet of surface casing on the well listed below to comply with the Minumum Casing Requirements adopted by the Arkansas Oil and Gas Commission.

O'Brien Operating Co. — OPERATOR

John Parnell #2 — LEASE AND WELL NO.

If you anticipate the need to pump the reserve pit down the well bore you should set a minimum of 1703 feet of surface casing. Permission must be obtained from a Commission engineer prior to the commencement of pumping operations.

Surface casing will be cemented to the surface of the earth. ALL cementing will be done by the pump and plug method.

You are REQUIRED to notify the Commission in ample time for an engineer of the Commission to be present to witness the running and cementing of the casing.

In the event that the well is to be abandoned, the Commission must be notified of same in ample time for an engineer of the Commission to be present to witness the plugging of the well. ALL wells will be plugged in accordance with Rules B-7 & B-8 of the General Rules and Regulations.

The Commission engineer for your area is Dennis Endel

ENGINEERS	AREA COUNTIES	HOME PHONE
Kirk Hudson	Hempstead, Lafayette, & Miller	863-0134
Steve Saulsbury	Columbia, Nevada, & Ouachita	862-6496
Dennis Endel	Ashley, Bradley, Calhoun, & Union	862-8434

In the event that the engineer of your area cannot be contacted, contact the office of the ARKANSAS OIL AND GAS COMMISSION, 2215 West Hillsboro, P.O. Box 1472, El Dorado, Arkansas 71731-1472. PHONE (501) 862-4965 between the hours of 8:00 A.M. to 5:00 P.M., Monday through Friday.

Re: John Parnell #2
Sec. 13–17S–16W
Agnes Road North Field

Dear Mr. Rogers,

Our records indicate that the above reference well was last permitted to operate as a Class II UIC well. However our records further indicate that a MIT (pressure) test, UIC well fee and the monthly reporting have not been maintained or filed as required for UIC wells. Please review your records and if you believe this is in error, please contact us promptly. Otherwise, you should determine whether the well has future utility and if so conduct the necessary work and apply and receive any necessary permits within sixty (60) days. If you have no intention to operate this well, please proceed with the proper well plugging activity within the next sixty (60) days.

Again, please review your records to ensure the accuracy of our records and findings. Please inform this office within thirty (30) days of your decision for the disposition of the referenced well. If you have any questions regarding this letter, please contact me at your earliest convenience.

Sincerely,

Gary D. Looney

OIL AND GAS LEASE
(PAID UP)

THIS AGREEMENT is made and entered into this 20th day of February, 2008, between:

MONICA KING, INDIVIDUALLY, AND AS AGENT AND ATTORNEY IN FACT FOR LOUIS PARNELL KING,
wife and husband
301 Wintergreen Court, Weatherford TX 76085 hereinafter called Lessor (whether one or more), and
STEVE ROGERS, 270 Meadow Hills, El Dorado, Arkansas, 71730, hereinafter called **Lessee**.

WITNESSETH: That the said Lessor, for and in consideration of ten and other valuable considerations ($10.00 OVC) DOLLARS cash in hand paid, the receipt of which is hereby acknowledged, and of the covenants and agreements hereinafter contained on the part of Lessee to be paid, kept, and performed, has GRANTED, DEMISED, LEASED and LET, and by these presents does GRANT, DEMISE, LEASE and LET unto the said Lessee, for the sole and only purpose of exploring by geophysical and other methods, mining and operating for oil (including but not limited to distillate and condensate), gas (including casinghead gas and helium and all other constituents), and for laying pipelines and building tanks, powers, stations, and structures thereon, to produce, save, and take care of said products, all that certain tract of land, together with any reversionary rights therein, situated in the State of Arkansas, and described as follows, to-_wit:

County Union **Section** 13 **Township** 17 South **Range** 16 West

SECTION 13: The East Half of the Northwest Quarter, 80 acres, and
The Southwest Quarter of the Northwest Quarter, 40 acres, and
The North Half of the Northwest Quarter of the Northwest Quarter, 20 acres.

and containing 140.0 acres, more or less. In addition to the land above described, Lessor hereby grants, leases, and lets exclusively unto Lessee, to the same extent as if specifically described herein, all lands owned or claimed by Lessor which are adjacent, contiguous to, or form a part of the lands above particularly described, including all oil, gas, and their constituents underlying lakes, rivers, streams, roads, easements and rights-of-way which traverse or adjoin any of said lands.

1. It is agreed that this lease shall remain in force for a term of THREE (3) years from date (herein called *primary term*) and as long thereafter as oil or gas, or either of them, is produced from said land by the Lessee, and as long thereafter as operations, as hereinafter defined, are conducted upon said land with no cessation for more than ninety (90) consecutive days. Whenever used in this lease the word "operations" shall mean operations for and any of the following: drilling, testing, completing, reworking, recompleting, deepening, plugging back or repairing of a well in search of or in an endeavor to obtain production of oil, gas, or other minerals, or production of oil, gas, or other minerals, whether or not in paying quantities. If while this lease is in force, at, or after the expiration of the primary term hereof, it is not being continued in force by reason of the shut-in well provisions hereinafter stated, and Lessee is not conducting operations on said land by reason of (1) any law, order, rule, or regulation (whether or not subsequently determined to be invalid), or (2) any other cause, whether similar or dissimilar, (except financial) beyond the reasonable control of Lessee, the primary term hereof shall be extended until the first anniversary date hereof occurring ninety (90) or more days following the removal of such delaying cause, and this lease may be extended thereafter by operations as if such delay had not occurred.

2. In consideration of the premises, the said Lessee covenants and agrees:
   A. To deliver to the credit of Lessor the one-eighth (1/8) part of all oil (including but not limited to condensate and distillate) produced and saved from the leased premises;
   B. To pay Lessor for gas of whatsoever nature or kind (with all of its constituents) produced and sold or used off the leased premises, or used in the manufacture of products therefrom, one-eighth (1/8) of the proceeds received for the gas sold, used off the premises, or in the manufacture of products therefrom, but in no event more than one-eighth (1/8) of the actual amount received by the Lessee, said payments to be made monthly;
   C. To pay Lessor for gas produced from any oil well and used off the premises, or for the manufacture of casinghead gasoline or dry commercial gas, one-eighth (1/8) of the proceeds, at the mouth of the well, received by Lessee for the gas during the time such gas shall be used, said payments to be made monthly;
   D. Lessee is authorized to deduct from such proceeds the cost incurred in compressing, treating, dehydrating, marketing and transporting such oil, gas and/or casinghead gas for delivery in computing the proceeds at the well payable as royalty; and
   E. That all royalties, shut-in royalties, or other sums which may become payable to Lessor under the terms of this lease may be paid or tendered by cash, check, draft, electronic funds transfer, or any other commercially reasonable method, which Lessee may elect from time to time.

3. If, at the expiration of the primary term or at any such time or times thereafter, there is any well on said land or on lands with which such land or any portion thereof has been pooled, capable of producing oil or gas, and all such wells are shut-in, this lease shall, nevertheless, continue in force as though operations were being conducted on said land for so long as said wells are shut-in, and thereafter this lease may be continued in force as if no shut-in had occurred. Lessee shall

not be obligated to install or furnish facilities other than well facilities and the ordinary lease facilities of flow lines, separator, and lease tank, and shall not be required to settle labor trouble or to market gas upon terms unacceptable to Lessee. If, at any time or times after the expiration of the primary term all such wells are shut-in for a period of ninety consecutive days, and during such time there are no operations on said land, then at or before the expiration of said ninety day period, Lessee shall pay or tender as royalty, a sum equal to one dollar ($1.00) per year per net royalty acre covered hereby. Lessee shall make like payments or tenders on or before the end of each anniversary of the expiration of said ninety day period if upon such anniversary this lease is being continued in force solely by reason of the provisions of this paragraph.

4. Lessee is hereby granted the right at any time and from time to time to unitize the leased premises or any portion or portions thereof, as to all strata or any stratum or strata, with any other lands, as to all strata or any stratum or strata, for the production primarily of oil or primarily of gas with or without distillate. However, no unit for the production primarily of oil shall embrace more than 160 acres, or for the production primarily of gas, with or without distillate, more than 640 acres; provided that if any governmental regulation shall prescribe a spacing pattern for the development of the field or allocate a producing allowable based on acreage per well, then any such unit may embrace as much additional acreage as may be so prescribed or as may be used in such allocation of allowable. Operations upon and production from the unit shall be treated as if such operations were upon or such production was from the leased premises whether or not the well or wells are located thereon. The entire acreage within a unit shall be treated for all purposes as if it were covered by and included in this lease except that the royalty on production from the unit shall be as below provided, and except that in calculating the amount of any shut-in gas royalties only that part of the acreage originally leased and then actually embraced by this lease shall be counted. In respect to production from the unit, Lessee shall pay Lessor, in lieu of other royalties thereon, only such proportion of the royalties stipulated herein as the amount of his acreage placed in the unit, or his royalty interest therein on an acreage basis bears to the total acreage in the unit. Lessee shall file written unit designations in the county in which the leased premises are located. Notwithstanding the limitation that a production unit for oil cannot exceed 160 acres, or a production unit for gas cannot exceed 640 acres, Lessee, as the agent for Lessor, is granted the right to execute all necessary ratifications of any unit agreement and/or unit operating agreements as may be necessary to obtain the approval of the Arkansas Oil & Gas Commission for the creation of a field-wide unit without regard to the size of such field-wide unit.

5. If said Lessor owns a less interest in the above described land than the entire and undivided fee simple estate therein, then the royalties herein provided shall be paid to the Lessor only in the proportion which his interest bears to the whole and undivided fee.

6. Lessee shall have the right to use, free from cost, gas, oil, and water produced on said land for its operations thereon, except water from wells of Lessor.

7. When requested by the Lessor, Lessee shall bury his pipelines below plow depth.

8. No well shall be drilled nearer than 200 feet to any house or barn now on said premises without the written consent of the Lessor.

9. Lessee shall pay for all damages caused by its operations inclusive of land, property and growing crops on said land.

10. Lessee shall have the right at any time to remove all machinery and fixtures placed on said premises, including the right to draw and remove casing.

11. If the estate of either party hereto is assigned, and the privilege of assigning in whole or in part is expressly allowed, the covenants hereof shall extend to their heirs, executors, administrators, successors, or assigns. However, no change or division in ownership of the land or royalties shall enlarge the obligations or diminish the rights of Lessee. No change in the ownership of the land or royalties shall be binding on the Lessee until after the Lessee has been furnished with a written transfer or assignment or a true copy thereof. In case Lessee assigns this lease, in whole or in part, Lessee shall be relieved of all obligations with respect to the assigned portion or portions arising subsequent to the date of assignment.

12. All express or implied covenants of this lease shall be subject to all Federal, State, and Municipal laws, Executive Orders, Rules, and Regulations, and this lease shall not be terminated in whole or in part, nor Lessee held liable in damages, for failure to comply therewith if compliance is prevented by or such failure is the result of any such Law, Order, Rule, or Regulation.

13. This lease shall be effective as to each Lessor on execution hereof as to his or her interest and shall be binding on those signing, notwithstanding some of the Lessors above named may not join in the execution hereof. The word Lessor as used in this lease means the party or parties who execute this lease as Lessor although not named above.

14. Lessee may at any time and from time to time surrender this lease as to any part or parts of the leased premises by delivering or mailing a release thereof to Lessor, or by placing a release of record in the proper County.

15. Lessor hereby warrants and agrees to defend the title to the lands herein described, and agrees that the Lessee shall have the right at any time to redeem for Lessor, by payment, any mortgages, taxes, or other liens on the above described lands, in the event of default of payment by Lessor, and be subrogated to the rights of the holder thereof.

16. Lessor hereby surrenders and releases all rights of dower and of courtesy and of homestead in the premises described herein, insofar as said rights of dower and of courtesy or of homestead may in any way affect the purposes for which this lease is made, as recited herein.

IN WITNESS WHEREOF we sign the day and year first above written.

Re: Parnell Lease
Agnes Road North Field
Union County, AR

Dear Mr. O'Brien:

An inspection of the Parnell Lease was made on August 20, 1993. At that time it was noted that the packing in the saltwater pump leaked severely and was creating a mess on the location. I talked by phone with your pumper, Mr. John Rogers, and he assured me that a method of containment and some "dress-up" work would be constructed within the next two weeks. A follow-up inspection was conducted yesterday and the location was found in considerable worse shape. The packing is leaking worse. A siphon hose has allowed tank "run-over" out of the firewall and left water and oil in depressions on the location that has run off into nearby timber. It will be necessary to clean up the location and construct a containment method for the saltwater pump discharge. If the firewalls cannot be kept clean enough to drain strictly fresh rain water, then you will have to pick up the fluid and run it through the system. A follow-up inspection will be made within fifteen (15) days.

If you have any question, please advise.

Sincerely,

Gary Looney

EL DORADO, ARKANSAS 71731-1472

ORDER NO. 513A-2007-07 **November 02, 2007**

AGNES ROAD NORTH FIELD
Union County, Arkansas

WELL ABANDONMENT

After due notice, followed by a public hearing held in El Dorado, Arkansas, on October 23, 2007, the Arkansas Oil and Gas Commission has, following said hearing, found the following facts and ordered the following wells abandoned.

FINDINGS OF FACT

From the evidence introduced at said hearing, the Commission finds:

1. The wells located in Section 13, Township 17 South, Range 16 West, in the Agnes Road North Field, Union County, which are the subject of the Order below, are the:

   a. Parnell, John, Et Al #1
   b. Parnell, John #2.

2. That the last operator of record for the well enumerated in Finding 1 above, is John C. Rogers.

3. That the last production from any of the wells enumerated in Finding No. 1 above was in excess of twenty-four months ago.

4. That the last known address for John C. Rogers, as listed on the Arkansas Oil and Gas Commission Forms 1 is 511 N. College Ave., El Dorado, Arkansas 71730.

5. That notice of this hearing was sent to John C. Rogers by first class mail.

6. That notice was published in newspapers of general circulation in Union County.

7. That John C. Rogers did not present himself at the hearing.

8. That the wells enumerated in Finding 1 have been abandoned by their operator, John C. Rogers.

CONCLUSIONS OF LAW

1. That due notice of public hearing was given as required by law and that this Commission has jurisdiction over said parties and the matter herein considered.

2. That this Commission has authority to grant said petition under the provisions of Arkansas Code Annotated 15-71-110 and 15-72-217.

ORDER

It is, therefore, ordered by the Commission that the well site enumerated in Finding 1 be declared abandoned and be plugged or re-plugged and surface conditions surrounding the well site be restored in accordance with Arkansas Code Annotated 15-72-217. However, in lieu of plugging the wells, the Director of Production and Conservation shall have authority to transfer the wells to another operator in accordance with all applicable Commission rules.

This Order shall be effective from and after November 02, 2007; and the Commission shall have continuing jurisdiction for the purposes of enforcement, and/or modifications or amendments to the provisions of this Order.

RETURN RECEIPT REQUESTED

December 4, 1992

O'Brien Operating Company
P.O. Box 6020
Shreveport, LA 71136-6020

Gentlemen:

The enclosed permit (No. 4083-WR-1) is your authority to construct, operate and maintain the John Parnell #2 Salt Water Disposal System as set forth in your application dated October 2, 1992.

This permit is issued subject to the provisions of the Arkansas Water and Air Pollution Contol Act (A.C.S. Sec. 8-4-101 et seq) and the terms and conditions stated therein. Approval for underground injection is also required from the Arkansas Oil and Gas Commmission.

After considering the facts and requirements of the aforementioned Act and implementing regulations, I have determined that Permit No. 4083-WR-1 for the construction, operation and maintenance of a water pollution control system for John Parnell #2 SWDS be issued and effective on the date specified in the permit, unless a Commission review has been properly requested under Section 4, Part III, of Regulation No. 8, Arkansas Department of Pollution Control and Ecology Administrative Procedures, within 30 days after service of this decision.

All persons entitled to do so, may request an adjudicatory hearing and Commission review on whether the decision of the Director should be reversed or modified. Such a request shall be in the form and manner required by Section 4, Part III of Regulation No. 8.

Sincerely,

Chuck Bennett
Chief, Water Division

FOR

O'BRIEN OPERATING COMPANY

ENGINEER: Ken Estes PERMIT NO. 4083-WR-1 DATE: 11/10/92

O'Brien Operating Company proposes to revise the permit to reflect a change in the construction and operation of the John Parnell No. 2 salt water disposal system located in Section 13, Township 17S, Range 16W, Agnes Road North Field, Union County, Arkansas. The John Parnell No. 2 well was converted to dispose of salt water into the Cotton Valley Formation at a subsurface depth interval of 4570 to 4635 feet. There will be 1 well connected to the system that produces 350 barrels of salt water per day. There is one 400 barrel holding tank with automatic cut-off switches to producing wells and firewalls around all salt water storage tanks provided to meet Department requirements for SWD systems. Injection pressure is 750 psig.

Flow rates can be verified by a turbine flow meter. A gauge will be placed on the well head for checking pressure.

There are no transfer stations connected to the disposal system.

The following well is approved for connection to the John Parnell No. 2 SWD System:

John Parnell Well No. 1 SENW Sec. 13-17S-16W 350 BW/D

Any modification of the system as described in the application will require a revision of the permit.

The revision of this permit was necessary to reflect the deletion of 400 barrels of water storage at the John Parnell No. 2 SWD System.

RETURN RECEIPT REQUESTED

December 4, 1991

O'Brien Operating Company
P.O. Box 6020
Shreveport, LA 71136-6020

Gentlemen:

The enclosed permit (No. 4083-W) is your authority to construct, operate and maintain the John Parnell #2 Salt Water Disposal System as set forth in your application dated July 18, 1991.

This permit is issued subject to the provisions of the Arkansas Water and Air Pollution Contol Act (A.C.S. Sec. 8-4-101 et seq) and the terms and conditions stated therein. Approval for underground injection is also required from the Arkansas Oil and Gas Commmission.

After considering the facts and requirements of the aforementioned Act and implementing regulations, I have determined that Permit No. 4083-W for the construction, operation and maintenance of a water pollution control system for John Parnell #2 SWD be issued and effective on the date specified in the permit, unless a Commission review has been properly requested under Section 4, Part III, of Regulation No. 8, Arkansas Department of Pollution Control and Ecology Administrative Procedures, within 30 days after service of this decision.

All persons entitled to do so, may request an adjudicatory hearing and Commission review on whether the decision of the Director should be reversed or modified. Such a request shall be in the form and manner required by Section 4, Part III of Regulation No. 8.

Sincerely,

Chuck Bennett
Chief, Water Division

NARRATIVE DESCRIPTION

FOR

O'BRIEN OPERATING COMPANY

ENGINEER: Ken Estes PERMIT NO. 4083-W DATE: 08/13/91

O'Brien Operating Company proposes to permit the construction and operation of the John Parnell No. 2 salt water disposal system located in Section 13, Township 17S, Range 16W, Agnes Road North Field, Union County, Arkansas. The John Parnell No. 2 well will be converted to dispose of salt water into the Cotton Valley Formation at a subsurface depth interval of 4570 to 4635 feet. There will be 1 well connected to the system that produces 350 barrels of salt water per day. There are two 400 barrel holding tanks with firewalls around all salt water storage tanks provided to meet Department requirements for SWD systems. Injection pressure is 750 psig.

Flow rates can be verified by turbine meter. A gauge will be placed on the well head for checking pressure.

There are no transfer stations connected to the disposal system.

The following wells are approved for connection to the John Parnell No. 2 SWD System:

John Parnell Well No. 1 SENW Sec. 13-17S-16W 350 BW/D

Any modification to the system as described in the application will require a revision of the permit.

This is the initial application for a permit to dispose of salt water by O'Brien Operating Company on the John Parnell No. 2 SWD System.

Permit No. 4083-W

Effective Date 01/02/92

To:

O'Brien Operating Company
P.O. Box 6020
Shreveport, LA 71136-6020

Consulting Engineer:

This permit is your authority to operate and maintain the waste disposal system as set forth in your application dated July 18, 1991. This permit is issued subject to provisions of the Arkansas Water and Air Pollution Control Act (A.C.A. Sec. 8-4-101 et seq.) and the following terms and conditions:

1. The disposal system shall be constructed or modified in accordance with the final plans and specification as approved by the Department of Pollution Control and Ecology.
2. This permit shall automatically terminate unless construction of the disposal system has commenced within 3 months of the effective date and completed with all reasonable diligence. The Department shall be notified in writing when the disposal system has been completed in order that it may be inspected.
3. The disposal system shall be operated by qualified personnel and maintained in good operating condition at all times.
4. By-passing of the disposal system is prohibited and will result in revocation of this permit and/or other appropriate enforcement action by the Department.
5. There shall be no increase in the volume or strength of the waste being treated by the disposal system except within design limits covered by the plans and specifications approved by the Department. No extension or modification of the disposal system may be made without the issuance of a new permit.
6. This permit may be revoked or modified whenever it is necessary, in the opinion of the Department, to prevent or abate pollution of any waters of the state.
7. Nothing herein contained shall be construed as releasing the permittee from any liability for damage to persons or property by reason of the installation, maintenance or operation of the disposal system.
8. This Permit is issued in reliance upon the statements and representations made in the application and the plans and specifications, and the Department has no responsibility for the adequacy or proper functioning of the disposal system.
9. PLEASE NOTE ADDITIONAL CONDITIONS ON THE ATTACHED SHEET.

RECEIVED DEC 06 1991

ARKANSAS DEPARTMENT OF POLLUTION CONTROL AND ECOLOGY

By: _____ 12/3/91
Chief, Water Division Date

Permit No. 4083-W
O'Brien Operating Co.

10. The permittee shall comply with all applicable permit fee requirements for state permits as described in ADPC&E Regulations No. 9 (Regulation for Fee System for Environmental Permits). Failure to promptly remit all required fees shall be grounds for the Director to initiate action to terminate this permit under the provisions of ADPC&E Regulation No. 8.

11. This system is known as the John Parnell #2 Salt Water Disposal System located in Section 13, Township 17 South, Range 16 West, Agnes Road North Field, Union County, El Dorado, Arkansas.

12. This permit is based on a projected disposal rate of 350 barrels per day. An increase of 15% or more above this amount will require modification of this permit.

13. The John Parnell #2 disposal well will receive salt water from the John Parnell #1 well. The same will be injected into the Cotton Valley Formation at a subsurface depth interval of 4570' to 4635'.

14. There shall be posted at the site of the well or tank battery a permanent sign bearing the name of the operator, the permit number, the lease, and legal description of the location.

15. No salt water shall be discharged to the surface waters of the State of Arkansas.

16. There shall be constructed around all salt water storage tanks an impermeable dike capable of holding 1.5 times the capacity of the largest tank contained within the berm.

17. As an adjunct to the above conditions, the permittee shall comply with all provisions of Arkansas Pollution Control and Ecology Commission Regulation No. 1.

Dear Mr. Rogers:

Please file the enclosed AOGC Form 4's "Producers Certificate of Complaince and Authorization to Transport Oil or Gas from Lease" on the referenced well. It is also necessary to file an additional $3,000 letter of credit to cover the operator change. I cannot approve the Form 4's on the John Parnell #1 well, Agnees Road North Field, into your name until all information is received by this office.

If we may be of any assistance, please advise.

CUSTOMER OR HIS AGENT WARRANTS THE WELL IS IN PROPER CONDITION TO RECEIVE THE PRODUCTS, SUPPLIES, MATERIALS, AND SERVICES

As consideration, the above-named Customer agrees: THIS CONTRACT MUST BE SIGNED BEFORE WORK IS COMMENCED

a) To pay Halliburton Reservoir Services (hereinafter called Halliburton) in accord with the rates and terms stated in Halliburton's current price list. Invoices are payable NET by the 20th of the following month after date of invoice. Upon Customer's default in payment of Customer's account by the last day of the month following the month in which the invoice is dated, Customer agrees to pay interest thereon after default at the highest lawful contract rate applicable, but never to exceed 18% per annum. In the event it becomes necessary to employ attorneys to enforce collection of said account, Customer agrees to pay all collection costs and attorney fees in the amount of 20% of the amount of the unpaid account.

b) To defend, indemnify, release and hold harmless Halliburton, its divisions, subsidiaries, parent and affiliated companies and the officers, directors, employees, agents and servants of all of them from and against any claims, liability, expenses, attorneys fees, and costs of defense to the extent permitted by law for:

1. Damage to property owned by, in the possession of, or leased by Customer, and/or the well owner (if different from Customer), including, but not limited to, surface and subsurface damage. The term "well owner" shall include working and royalty interest owners.
2. Reservoir, formation, or well loss or damage, subsurface trespass or any action in the nature thereof.
3. Personal injury or death or property damage (including, but not limited to, damage to the reservoir, formation or well), or any damages whatsoever, growing out of or in any way connected with or resulting from pollution, subsurface pressure, losing control of the well and/or a well blowout or the use of radioactive material.

The defense, indemnity, release and hold harmless obligations of Customer provided for in this Section b) and Section c) below shall apply to claims or liability even if caused or contributed to by Halliburton's negligence, strict liability, or the unseaworthiness of any vessel owned, operated, or furnished by Halliburton or any defect in the data, products, supplies, materials, or equipment of Halliburton whether in the preparation, design, manufacture, distribution, or marketing thereof, or from a failure to warn any person of such defect. Such defense, indemnity, release and hold harmless obligations of Customer shall not apply where the claims or liability are caused by the gross negligence or willful misconduct of Halliburton. The term "Halliburton" as used in said Sections b) and c) shall mean Halliburton, its divisions, subsidiaries, parent and affiliated companies, and the officers, directors, employees, agents and servants of all of them.

c) That because of the uncertainty of variable well conditions and the necessity of relying on facts and supporting services furnished by others, Halliburton is unable to guarantee the effectiveness of the products, supplies or materials, nor the results of any treatment or service, nor the accuracy of any chart interpretation, research analysis, job recommendation or other data furnished by Halliburton. Halliburton personnel will use their best efforts in gathering such information and their best judgment in interpreting it, but Customer agrees that Halliburton shall not be liable for and Customer shall indemnify Halliburton against any damages arising from the use of such information.

d) That Halliburton warrants only title to the products, supplies and materials and that the same are free from defects in workmanship and materials. THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY, FITNESS OR OTHERWISE WHICH EXTEND BEYOND THOSE STATED IN THE IMMEDIATELY PRECEDING SENTENCE. Halliburton's liability and Customer's exclusive remedy in any cause of action (whether in contract, tort, breach of warranty or otherwise) arising out of the sale or use of any products, supplies or materials is expressly limited to the replacement of such products, supplies or materials on their return to Halliburton or, at Halliburton's option, to the allowance to the Customer of credit for the cost of such items. In no event shall Halliburton be liable for special, incidental, indirect, punitive or consequential damages.

e) That Customer shall, at its risk and expense, attempt to recover any Halliburton equipment, tools or instruments which are lost in the well and if such equipment, tools or instruments are not recovered, Customer shall pay Halliburton its replacement cost unless such loss is due to the sole negligence of Halliburton. If Halliburton equipment, tools or instruments are damaged in the well, Customer shall pay Halliburton the lesser of its replacement cost or the cost of repairs unless such damage is caused by the sole negligence of Halliburton. In the case of equipment, tools or instruments for marine operations, Customer shall, in addition to the foregoing, be fully responsible for loss of or damage to any of Halliburton's equipment, tools or instruments which occurs at any time after delivery to Customer at the landing until returned to the landing, unless such loss or damage is caused by the sole negligence of Halliburton.

f) To waive the provisions of the Deceptive Trade Practices - Consumer Protection Act, to the extent permitted by law.

g) That this contract shall be governed by the law of the state where services are performed or materials are furnished.

h) That Halliburton shall not be bound by any changes or modifications in this contract, except where such change or modification is made in writing by a duly authorized executive officer of Halliburton.

I HAVE READ AND UNDERSTAND THIS CONTRACT AND REPRESENT THAT I AM AUTHORIZED TO SIGN THE SAME AS CUSTOMER'S AGENT.

Re: Parnell 1, PN 33912
Parnell 2 SWD, PN 34337
Agnes Road North Field
Union County, AR

Dear Mr. Rogers,

I have received an email from Mr. Martin Parnell King regarding the two above referenced wells which he purports to be located on property of his family. Having received his email, I reviewed the well and production files for both wells. Our records indicate that the production of oil ceased in May, 1991. Our records also indicate that the Class II disposal well has not demonstrated integrity within the required timeframe. A letter in the files from 2018 further indicates that we have discussed this matter in the past however at that time, I failed to follow up with you on it.

It would appear that both wells should now be plugged, any remaining equipment removed and the surface restored. If you do not wish to plug the Parnell wells, given the amount of time which has elapsed since last production, it will be necessary to file an application for hearing should you wish to temporary abandon these wells for any additional period of time. Please review your records as necessary and respond in writing to me within 30 days of your decision to plug the Parnell 1 and 2 wells or seek a temporary abandon status through the hearing process. If you wish to discuss this matter, please contact me at your earliest convenience.

Sincerely,

Gary D. Looney

OIL AND GAS LEASE
(PAID UP)

THIS AGREEMENT is made and entered into this 20th day of February, 2008, between

MONICA KING, INDIVIDUALLY, AND AS AGENT AND ATTORNEY IN FACT FOR LOUIS PARNELL KING,

wife and husband

301 Wintergreen Court, Weatherford TX 76085 hereinafter called **Lessor** (whether one or more), and

STEVE ROGERS, 270 Meadow Hills, El Dorado, Arkansas, 71730, hereinafter called **Lessee**

WITNESSETH That the said Lessor, for and in consideration of ten and other valuable considerations ($10 00 OVC) DOLLARS cash in hand paid, the receipt of which is hereby acknowledged, and of the covenants and agreements hereinafter contained on the part of Lessee to be paid, kept, and performed, has GRANTED, DEMISED, LEASED and LET, and by these presents does GRANT, DEMISE, LEASE and LET unto the said Lessee, for the sole and only purpose of exploring by geophysical and other methods, mining and operating for oil (including but not limited to distillate and condensate), gas (including casinghead gas and helium and all other constituents), and for laying pipelines and building tanks, powers, stations, and structures thereon, to produce, save, and take care of said products, all that certain tract of land, together with any reversionary rights therein, situated in the State of Arkansas, and described as follows, to-_wit

County Union **Section** 13 **Township** 17 South **Range** 16 West

SECTION 13 The East Half of the Northwest Quarter, 80 acres, and
The Southwest Quarter of the Northwest Quarter, 40 acres, and
The North Half of the Northwest Quarter of the Northwest Quarter, 20 acres

and containing 140 0 acres, more or less In addition to the land above described, Lessor hereby grants, leases, and lets exclusively unto Lessee, to the same extent as if specifically described herein, all lands owned or claimed by Lessor which are adjacent, contiguous to, or form a part of the lands above particularly described, including all oil, gas, and their constituents underlying lakes, rivers, streams, roads, easements and rights-of-way which traverse or adjoin any of said lands

1 It is agreed that this lease shall remain in force for a term of THREE (3) years from date (herein called *primary term*) and as long thereafter as oil or gas, or either of them, is produced from said land by the Lessee, and as long thereafter as operations, as hereinafter defined, are conducted upon said land with no cessation for more than ninety (90) consecutive days Whenever used in this lease the word "operations" shall mean operations for and any of the following drilling, testing, completing, reworking, recompleting, deepening, plugging back or repairing of a well in search of or in an endeavor to obtain production of oil, gas, or other minerals, or production of oil, gas, or other minerals, whether or not in paying quantities If while this lease is in force, at, or after the expiration of the primary term hereof, it is not being continued in force by reason of the shut-in well provisions hereinafter stated, and Lessee is not conducting operations on said land by reason of (1) any law, order, rule or regulation (whether or not subsequently determined to be invalid), or (2) any other cause, whether similar or dissimilar, (except financial) beyond the reasonable control of Lessee, the primary term hereof shall be extended until the first anniversary date hereof occurring ninety (90) or more days following the removal of such delaying cause, and this lease may be extended thereafter by operations as if such delay had not occurred

2 In consideration of the premises, the said Lessee covenants and agrees
- A To deliver to the credit of Lessor the one-eighth (1/8) part of all oil (including but not limited to condensate and distillate) produced and saved from the leased premises,
- B To pay Lessor for gas of whatsoever nature or kind (with all of its constituents) produced and sold or used off the leased premises, or used in the manufacture of products therefrom, one-eighth (1/8) of the proceeds received for the gas sold, used off the premises, or in the manufacture of products therefrom, but in no event more than one-eighth (1/8) of the actual amount received by the Lessee, said payments to be made monthly,
- C To pay Lessor for gas produced from any oil well and used off the premises, or for the manufacture of casinghead gasoline or dry commercial gas, one-eighth (1/8) of the proceeds, at the mouth of the well, received by Lessee for the gas during the time such gas shall be used, said payments to be made monthly,
- D Lessee is authorized to deduct from such proceeds the cost incurred in compressing, treating, dehydrating, marketing and transporting such oil, gas and/or casinghead gas for delivery in computing the proceeds at the well payable as royalty, and
- E That all royalties, shut-in royalties, or other sums which may become payable to Lessor under the terms of this lease may be paid or tendered by cash, check, draft, electronic funds transfer, or any other commercially reasonable method, which Lessee may elect from time to time

3 If, at the expiration of the primary term or at any such time or times thereafter, there is any well on said land or on lands with which such land or any portion thereof has been pooled, capable of producing oil or gas, and all such wells are shut-in, this lease shall, nevertheless, continue in force as though operations were being conducted on said land for so long as said wells are shut-in, and thereafter this lease may be continued in force as if no shut-in had occurred Lessee shall

not be obligated to install or furnish facilities other than well facilities and the ordinary lease facilities of flow lines, separator, and lease tank, and shall not be required to settle labor trouble or to market gas upon terms unacceptable to Lessee If, at any time or times after the expiration of the primary term all such wells are shut-in for a period of ninety consecutive days, and during such time there are no operations on said land, then at or before the expiration of said ninety day period, Lessee shall pay or tender as royalty, a sum equal to one dollar ($1 00) per year per net royalty acre covered hereby Lessee shall make like payments or tenders on or before the end of each anniversary of the expiration of said ninety day period if upon such anniversary this lease is being continued in force solely by reason of the provisions of this paragraph

4 Lessee is hereby granted the right at any time and from time to time to unitize the leased premises or any portion or portions thereof, as to all strata or any stratum or strata, with any other lands, as to all strata or any stratum or strata, for the production primarily of oil or primarily of gas with or without distillate However, no unit for the production primarily of oil shall embrace more than 160 acres, or for the production primarily of gas, with or without distillate, more than 640 acres, provided that if any governmental regulation shall prescribe a spacing pattern for the development of the field or allocate a producing allowable based on acreage per well, then any such unit may embrace as much additional acreage as may be so prescribed or as may be used in such allocation of allowable Operations upon and production from the unit shall be treated as if such operations were upon or such production was from the leased premises whether or not the well or wells are located thereon The entire acreage within a unit shall be treated for all purposes as if it were covered by and included in this lease except that the royalty on production from the unit shall be as below provided, and except that in calculating the amount of any shut-in gas royalties only that part of the acreage originally leased and then actually embraced by this lease shall be counted In respect to production from the unit, Lessee shall pay Lessor, in lieu of other royalties thereon, only such proportion of the royalties stipulated herein as the amount of his acreage placed in the unit, or his royalty interest therein on an acreage basis bears to the total acreage in the unit. Lessee shall file written unit designations in the county in which the leased premises are located Notwithstanding the limitation that a production unit for oil cannot exceed 160 acres, or a production unit for gas cannot exceed 640 acres, Lessee, as the agent for Lessor, is granted the right to execute all necessary ratifications of any unit agreement and/or unit operating agreements as may be necessary to obtain the approval of the Arkansas Oil & Gas Commission for the creation of a field-wide unit without regard to the size of such field-wide unit

5 If said Lessor owns a less interest in the above described land than the entire and undivided fee simple estate therein, then the royalties herein provided shall be paid to the Lessor only in the proportion which his interest bears to the whole and undivided fee

6 Lessee shall have the right to use, free from cost, gas, oil, and water produced on said land for its operations thereon, except water from wells of Lessor

7 When requested by the Lessor, Lessee shall bury his pipelines below plow depth

8 No well shall be drilled nearer than 200 feet to any house or barn now on said premises without the written consent of the Lessor

9 Lessee shall pay for all damages caused by its operations inclusive of land, property and growing crops on said land

10 Lessee shall have the right at any time to remove all machinery and fixtures placed on said premises, including the right to draw and remove casing

11 If the estate of either party hereto is assigned, and the privilege of assigning in whole or in part is expressly allowed, the covenants hereof shall extend to their heirs, executors, administrators, successors, or assigns However, no change or division in ownership of the land or royalties shall enlarge the obligations or diminish the rights of Lessee No change in the ownership of the land or royalties shall be binding on the Lessee until after the Lessee has been furnished with a written transfer or assignment or a true copy thereof In case Lessee assigns this lease, in whole or in part, Lessee shall be relieved of all obligations with respect to the assigned portion or portions arising subsequent to the date of assignment

12 All express or implied covenants of this lease shall be subject to all Federal, State, and Municipal laws, Executive Orders, Rules, and Regulations, and this lease shall not be terminated in whole or in part, nor Lessee held liable in damages, for failure to comply therewith if compliance is prevented by or such failure is the result of any such Law, Order, Rule, or Regulation

13 This lease shall be effective as to each Lessor on execution hereof as to his or her interest and shall be binding on those signing, notwithstanding some of the Lessors above named may not join in the execution hereof The word Lessor as used in this lease means the party or parties who execute this lease as Lessor although not named above

14 Lessee may at any time and from time to time surrender this lease as to any part or parts of the leased premises by delivering or mailing a release thereof to Lessor, or by placing a release of record in the proper County

15 Lessor hereby warrants and agrees to defend the title to the lands herein described, and agrees that the Lessee shall have the right at any time to redeem for Lessor, by payment, any mortgages, taxes, or other liens on the above described lands, in the event of default of payment by Lessor, and be subrogated to the rights of the holder thereof

16 Lessor hereby surrenders and releases all rights of dower and of courtesy and of homestead in the premises described herein, insofar as said rights of dower and of courtesy or of homestead may in any way affect the purposes for which this lease is made, as recited herein

IN WITNESS WHEREOF we sign the day and year first above written

ARKANSAS OIL AND GAS COMMISSION
2215 WEST HILLSBORO
P. O. BOX 1472
EL DORADO, ARKANSAS 71731-1472

ORDER NO. 513A-2007-07 **November 02, 2007**

AGNES ROAD NORTH FIELD
Union County, Arkansas

WELL ABANDONMENT

After due notice, followed by a public hearing held in El Dorado, Arkansas, on October 23, 2007, the Arkansas Oil and Gas Commission has, following said hearing, found the following facts and ordered the following wells abandoned

FINDINGS OF FACT

From the evidence introduced at said hearing, the Commission finds

1 The wells located in Section 13, Township 17 South, Range 16 West, in the Agnes Road North Field, Union County, which are the subject of the Order below, are the

a Parnell, John, Et Al #1
b Parnell, John #2

2 That the last operator of record for the well enumerated in Finding 1 above, is John C. Rogers

3 That the last production from any of the wells enumerated in Finding No 1 above was in excess of twenty-four months ago

4 That the last known address for John C Rogers, as listed on the Arkansas Oil and Gas Commission Forms 1 is 511 N College Ave , El Dorado, Arkansas 71730

5 That notice of this hearing was sent to John C Rogers by first class mail

6. That notice was published in newspapers of general circulation in Union County

7. That John C Rogers did not present himself at the hearing

8 That the wells enumerated in Finding 1 have been abandoned by their operator, John C Rogers

CONCLUSIONS OF LAW

1 That due notice of public hearing was given as required by law and that this Commission has jurisdiction over said parties and the matter herein considered

2 That this Commission has authority to grant said petition under the provisions of Arkansas Code Annotated 15-71-110 and 15-72-217

ORDER

It is, therefore, ordered by the Commission that the well site enumerated in Finding 1 be declared abandoned and be plugged or re-plugged and surface conditions surrounding the well site be restored in accordance with Arkansas Code Annotated 15-72-217 However, in lieu of plugging the wells, the Director of Production and Conservation shall have authority to transfer the wells to another operator in accordance with all applicable Commission rules

This Order shall be effective from and after November 02, 2007, and the Commission shall have continuing jurisdiction for the purposes of enforcement, and/or modifications or amendments to the provisions of this Order

Dear Sir:

This letter is to inform you that approval of your application to inject produced salt water into the above referenced well shall be forth coming. If you will file the following information with this office upon completion of the above referenced well, the authority to dispose will be granted, provided that you have complied with the rules and regulations of the Arkansas Oil and Gas Commission.

1) Recompletion Report.
2) Service Company Tickets.

If I may be of further assistance, please call.

Sincerely,

Martin T. Perdue

Re: John Parnell #2 SWD
Sec. 13-17S-16W
Agnes Road North Field
Union County, AR

Gentlemen:

Your application filed for authority to dispose of produced salt water into the referenced well has been reviewed and appears to meet the necessary requirements of the state. Please consider this letter as your authority to use the referenced well for disposal of produced water only, and in accordance with the provisions of the application as filed. Disposal shall be down the tubing string with a packer set immediately above the disposal zone as approved. Provisions to monitor the annulus between the tubing and casing strings shall also be required.

Only water from the applied for and approved wells shall be authorized for disposal in the above referenced SWD well and pressures and volumes shall comply with the application as filed.

It is requested that upon completion of the referenced salt water disposal that this office be notified for inspection and running of a mechanical integrity test on the referenced well. Additionally, monthly disposal reports (AOGC-14) shall be required; whereas, both annulus pressure and injection pressure are shown. Further, a completion report shall be filed indicating the perforated interval and tubing and packer settings.

Yours very truly,

Martin T. Perdue

Re· Parnell Lease
Agnes Road North Field
Union County, AR

Dear Mr O'Brien:

An inspection of the Parnell Lease was made on August 20, 1993. At that time it was noted that the packing in the saltwater pump leaked severely and was creating a mess on the location. I talked by phone with your pumper, Mr John Rogers, and he assured me that a method of containment and some "dress-up" work would be constructed within the next two weeks A follow-up inspection was conducted yesterday and the location was found in considerable worse shape The packing is leaking worse. A siphon hose has allowed tank "run-over" out of the firewall and left water and oil in depressions on the location that has run off into nearby timber It will be necessary to clean up the location and construct a containment method for the saltwater pump discharge If the firewalls cannot be kept clean enough to drain strictly fresh rain water, then you will have to pick up the fluid and run it through the system A follo -up inspection will be made within fifteen (15) days

If you have any question, please advise

Sincerely,

Gary Looney

PROCEDURES AND REQUIREMENTS FOR SURFACE CASING AND THE PLUGGING OF WELLS

You are REQUIRED to set a minimum of 750 feet of surface casing on the well listed below to comply with the Minumum Casing Requirements adopted by the Arkansas Oil and Gas Commission.

O'Brien Operating Co. — OPERATOR

John Parnell #2 — LEASE AND WELL NO.

If you anticipate the need to pump the reserve pit down the well bore you should set a minimum of 1703 feet of surface casing. Permission must be obtained from a Commission engineer prior to the commencement of pumping operations.

Surface casing will be cemented to the surface of the earth. ALL cementing will be done by the pump and plug method.

You are REQUIRED to notify the Commission in ample time for an engineer of the Commission to be present to witness the running and cementing of the casing.

In the event that the well is to be abandoned, the Commission must be notified of same in ample time for an engineer of the Commission to be present to witness the plugging of the well. ALL wells will be plugged in accordance with Rules B-7 & B-8 of the General Rules and Regulations.

The Commission engineer for your area is Dennis Endel

ENGINEERS	AREA COUNTIES	HOME PHONE
Kirk Hudson	Hempstead, Lafayette, & Miller	863-0134
Steve Saulsbury	Columbia, Nevada, & Ouachita	862-6496
Dennis Endel	Ashley, Bradley, Calhoun, & Union	862-8434

In the event that the engineer of your area cannot be contacted, contact the office of the ARKANSAS OIL AND GAS COMMISSION, 2215 West Hillsboro, P.O. Box 1472, El Dorado, Arkansas 71731-1472. PHONE (501) 862-4965 between the hours of 8:00 A.M. to 5:00 P.M., Monday through Friday.

RE: O'Brien Operating Company
John Parnell #2 SWD Well
Agnes Road North Field
Union County, Arkansas

Dear Mr. Rogers:

Please file the enclosed AOGC Form 4's "Producers Certificate of Complaince and Authorization to Transport Oil or Gas from Lease" on the referenced well. It is also necessary to file an additional $3,000 letter of credit to cover the operator change. I cannot approve the Form 4's on the John Parnell #1 well, Agnees Road North Field, into your name until all information is received by this office.

If we may be of any assistance, please advise.

Yours truly,

Shirley Knight

NARRATIVE DESCRIPTION

FOR

O'BRIEN OPERATING COMPANY

ENGINEER: Ken Estes PERMIT NO. 4083-W DATE: 08/13/91

O'Brien Operating Company proposes to permit the construction and operation of the John Parnell No. 2 salt water disposal system located in Section 13, Township 17S, Range 16W, Agnes Road North Field, Union County, Arkansas. The John Parnell No. 2 well will be converted to dispose of salt water into the Cotton Valley Formation at a subsurface depth interval of 4570 to 4635 feet. There will be 1 well connected to the system that produces 350 barrels of salt water per day. There are two 400 barrel holding tanks with firewalls around all salt water storage tanks provided to meet Department requirements for SWD systems. Injection pressure is 750 psig.

Flow rates can be verified by turbine meter. A gauge will be placed on the well head for checking pressure.

There are no transfer stations connected to the disposal system.

The following wells are approved for connection to the John Parnell No. 2 SWD System:

John Parnell Well No. 1 SENW Sec. 13-17S-16W 350 BW/D

Any modification to the system as described in the application will require a revision of the permit.

This is the initial application for a permit to dispose of salt water by O'Brien Operating Company on the John Parnell No. 2 SWD System.

DEC 06 1991

Issued By

STATE OF ARKANSAS
DEPARTMENT OF POLLUTION CONTROL AND ECOLOGY
8001 NATIONAL DRIVE, P.O. BOX 9583
LITTLE ROCK, ARKANSAS 72209

CSN No. 70-0424

Permit No. 4083-W

Effective Date 01/02/92

To:

O'Brien Operating Company
P.O. Box 6020
Shreveport, LA 71136-6020

Consulting Engineer:

This permit is your authority to operate and maintain the waste disposal system as set forth in your application dated July 18, 1991. This permit is issued subject to provisions of the Arkansas Water and Air Pollution Control Act (A.C.A. Sec. 8-4-101 et seq.) and the following terms and conditions:

1. The disposal system shall be constructed or modified in accordance with the final plans and specification as approved by the Department of Pollution Control and Ecology.
2. This permit shall automatically terminate unless construction of the disposal system has commenced within 3 months of the effective date and completed with all reasonable diligence. The Department shall be notified in writing when the disposal system has been completed in order that it may be inspected.
3. The disposal system shall be operated by qualified personnel and maintained in good operating condition at all times.
4. By-passing of the disposal system is prohibited and will result in revocation of this permit and/or other appropriate enforcement action by the Department.
5. There shall be no increase in the volume or strength of the waste being treated by the disposal system except within design limits covered by the plans and specifications approved by the Department. No extension or modification of the disposal system may be made without the issuance of a new permit.
6. This permit may be revoked or modified whenever it is necessary, in the opinion of the Department, to prevent or abate pollution of any waters of the state.
7. Nothing herein contained shall be construed as releasing the permittee from any liability for damage to persons or property by reason of the installation, maintenance or operation of the disposal system.
8. This Permit is issued in reliance upon the statements and representations made in the application and the plans and specifications, and the Department has no responsibility for the adequacy or proper functioning of the disposal system.
9. PLEASE NOTE ADDITIONAL CONDITIONS ON THE ATTACHED SHEET.

ARKANSAS DEPARTMENT OF POLLUTION CONTROL AND ECOLOGY

By: _____ 12/3/91
Chief, Water Division Date

10. The permittee shall comply with all applicable permit fee requirements for state permits as described in ADPC&E Regulations No. 9 (Regulation for Fee System for Environmental Permits). Failure to promptly remit all required fees shall be grounds for the Director to initiate action to terminate this permit under the provisions of ADPC&E Regulation No. 8.

11. This system is known as the John Parnell #2 Salt Water Disposal System located in Section 13, Township 17 South, Range 16 West, Agnes Road North Field, Union County, El Dorado, Arkansas.

12. This permit is based on a projected disposal rate of 350 barrels per day. An increase of 15% or more above this amount will require modification of this permit.

13. The John Parnell #2 disposal well will receive salt water from the John Parnell #1 well. The same will be injected into the Cotton Valley Formation at a subsurface depth interval of 4570' to 4635'.

14. There shall be posted at the site of the well or tank battery a permanent sign bearing the name of the operator, the permit number, the lease, and legal description of the location.

15. No salt water shall be discharged to the surface waters of the State of Arkansas.

16. There shall be constructed around all salt water storage tanks an impermeable dike capable of holding 1.5 times the capacity of the largest tank contained within the berm.

17. As an adjunct to the above conditions, the permittee shall comply with all provisions of Arkansas Pollution Control and Ecology Commission Regulation No. 1.

RETURN RECEIPT REQUESTED

December 4, 1991

O'Brien Operating Company
P.O. Box 6020
Shreveport, LA 71136-6020

Gentlemen:

The enclosed permit (No. 4083-W) is your authority to construct, operate and maintain the John Parnell #2 Salt Water Disposal System as set forth in your application dated July 18, 1991.

This permit is issued subject to the provisions of the Arkansas Water and Air Pollution Contol Act (A.C.S. Sec. 8-4-101 et seq) and the terms and conditions stated therein. Approval for underground injection is also required from the Arkansas Oil and Gas Commmission.

After considering the facts and requirements of the aforementioned Act and implementing regulations, I have determined that Permit No. 4083-W for the construction, operation and maintenance of a water pollution control system for John Parnell #2 SWD be issued and effective on the date specified in the permit, unless a Commission review has been properly requested under Section 4, Part III, of Regulation No. 8, Arkansas Department of Pollution Control and Ecology Administrative Procedures, within 30 days after service of this decision.

All persons entitled to do so, may request an adjudicatory hearing and Commission review on whether the decision of the Director should be reversed or modified. Such a request shall be in the form and manner required by Section 4, Part III of Regulation No. 8.

Sincerely,

Chuck Bennett
Chief, Water Division

NARRATIVE DESCRIPTION

FOR

O'BRIEN OPERATING COMPANY

ENGINEER: Ken Estes PERMIT NO. 4083-WR-1 DATE: 11/10/92

O'Brien Operating Company proposes to revise the permit to reflect a change in the construction and operation of the John Parnell No. 2 salt water disposal system located in Section 13, Township 17S, Range 16W, Agnes Road North Field, Union County, Arkansas. The John Parnell No. 2 well was converted to dispose of salt water into the Cotton Valley Formation at a subsurface depth interval of 4570 to 4635 feet. There will be 1 well connected to the system that produces 350 barrels of salt water per day. There is one 400 barrel holding tank with automatic cut-off switches to producing wells and firewalls around all salt water storage tanks provided to meet Department requirements for SWD systems. Injection pressure is 750 psig.

Flow rates can be verified by a turbine flow meter. A gauge will be placed on the well head for checking pressure.

There are no transfer stations connected to the disposal system.

The following well is approved for connection to the John Parnell No. 2 SWD System:

John Parnell Well No. 1 SENW Sec. 13-17S-16W 350 BW/D

Any modification of the system as described in the application will require a revision of the permit.

The revision of this permit was necessary to reflect the deletion of 400 barrels of water storage at the John Parnell No. 2 SWD System.

APPLICATION TO INJECT SALT WATER/ENHANCED RECOVERY FLUID

Arkansas Oil & Gas Commission
2215 West Hillsboro
P.O. Box 1472
El Dorado, AR 71731-1472

Arkansas Department of Pollution
Control and Ecology
P.O. Box 851
El Dorado, AR 71731-0851

Note: In an effort to reduce the amount of paperwork necessary to permit a Salt Water Injection System both regulatory agencies involved have combined their applications. Upon completion of this form send a copy to each agency listed above. Any modifications, alterations, additions or changes in the permitted system, well connected thereto, and quantities of salt water injected will require permit revision by both the ADPC&E and the AO&GC. Both regulatory agencies must be notified in writing, and approval granted before modifications can be enacted. All applications for disposal of oil field wastes by other than injection wells shall be submitted to the ADPC&E's office in Little Rock.

PERMIT FEES--ARKANSAS DEPARTMENT OF POLLUTION CONTROL AND ECOLOGY
In accordance with Act 817 of 1983 and regulations promulgated thereto, a fee is required to be paid by the applicant prior to the issuance, modification, or renewal/reissuance of a permit. In addition, the permittee will be assessed an annual review fee in accordance with the permit fee regulations. The purpose of the permit fees is to help defray the administrative cost of issuance, renewal, inspection, modification, and monitoring associated with these permits. The initial permit application fee for salt water injection permits is $150.00, and should be submitted along with the permit application. This fee is payable by cash, check or money order and must be received by the Department of Pollution Control and Ecology before the permit can be issued.

PERMIT FEES--ARKANSAS OIL AND GAS COMMISSION
In accordance with Order Reference Number 185-84 a fee on one hundred dollars ($100.00) is required to be submitted with each application. In addition to the application fee a non-transferrable fee of one hundred dollars ($100.00) per injection/enhanced recovery well per year is required to be paid to the Arkansas Oil and Gas Commission by July 1 of each year.

OWNER/OPERATOR O'Brien Operating Company

STREET P.O. Box 6020

CITY Shreveport STATE LA ZIP 71136-6020

A list of the names, addresses and telephone numbers of supervisory and field personnel responsible for the disposal system.

J.R. Gordon P.O. Box 6020 Shreveport, LA 71136-6020 318/869-3247

John Rogers 1005 Palm Dr. El Dorado, AR 71730 501/863-8623

I. This application is for approval to inject (X) Produced Salt Water ( ) Enhanced Recovery Fluid into the (Zone) Cotton Valley of the Agnes Road North Field, at a depth interval of 4570 to 4635 feet SUB-SURFACE in the system known as the John Parnell No. 2 at a location described as being 1000' FWL & 2000' FNL of Section 13 Township 17S Range 16W of Union County, Arkansas. The nearest city/town is El Dorado, AR

It is proposed to begin disposal operations on or about August 15, 1991.

The estimated cost of the facilities is $ 20,000.

RECEIVED JUL 10 1991

This application is being filed under the requirements of Rule C-7 (C-7, C-8, or C-9 indicate which) of the General Rules and Regulations of the Arkansas Oil and Gas Commission.

C-7 If there is NO production within a 1/2 mile radius of the proposed inject well in the proposed injection zone.
C-8 If there IS production within a 1/2 mile radius of the proposed injection well in the proposed injection zone.
C-9 Using gas to maintain or repressure a reservoir.

II. (Complete either (A) or (B) as applicable.) See Attachment for construction requirements.

A. (X) This well is a COMPLETED well and will be converted to injection service; it is cased and cemented as indicated below:

(SIZE) 8-5/8 Surface Casing set at 762 feet with 350 sacks.

(SIZE) 5-1/2 Production Casing set at 5730 feet with 665 sacks.

(SIZE) 2-7/8 Injection Tubing set at 4470 feet with PACKER set at 4473 feet.
(Note: All injection wells must have tubing and a packer or other installation to protect the casing. The packer can be set no higher than 100 feet above injection interval.)

All available logs are enclosed: (X) Yes ( ) No

Hole/bit size is 7-7/8 inches. Total depth of the well is 6001 feet.

B. ( ) This well WILL BE DRILLED for injection service and a regular fee drilling application will be submitted. We plan to case and cement the well as indicated below:

(SIZE) _____ Surface Casing set at _____ feet with _____ sacks.

(SIZE) _____ Production Casing set at _____ feet with _____ sacks.

(SIZE) _____ Injection Tubing set at _____ feet with Packer set at _____ feet.
(Note: All injection wells must have tubing and a packer or other installation to protect the casing. The packer can be set no higher than 100 feet above injection interval.)

Hole/Bit size proposed is _____ inches. Total depth of well proposed is _____ feet.

III. Each of the operators listed below owning leases within the one-half (1/2) mile radius of the proposed injection well have received a copy of this application by certified mail and copies of the return receipts have been attached to this application as proof thereof.

LEASE	OPERATOR	ADDRESS
None	No Offset Operators	

(If additional space is needed, attach a separate sheet.)

IV. A plat is attached which indicates the location of the proposed injection well with distances to nearest lease lines. Also shown on the plat are all wells of public record and fresh water wells of public record within a one-half (1/2) mile radius from the proposed injection well. A separate list of all wells which have penetrated the injection zone is included to indicate: (Information submitted MUST agree with AOGC records.)

1. Exact Legal Location
2. Current Operator
3. Lease Name
4. Name of Zone Currently Completed
5. Perforated Intervals
6. Total Depth
7. Drilling Date
8. Cementing Records
9. Record of Completion/Plugging
10. Current Status-Specify
    a. Producing
    b. Shut In
    c. Injection (disposal or enhanced rec.)
    d. Municipal Water Supply
    e. Permanently Abandoned
    f. Specify Other Status

V. A schematic drawing of the sub-surface installation is attached to show casing, approximate top and bottom of cement, tubing, packers, perforations, and well head of the injection well. Equipment must be installed and used to assure that injection will be confined to the proposed injection zone.

O'BRIEN OPERATING COMPANY
APPLICATION FOR SALTWATER DISPOSAL
JOHN PARNELL NO. 2
AGNES ROAD NORTH FIELD
UNION COUNTY, ARKANSAS
EXHIBIT XVI

XIV. A. The estimated maximum amounts of produced salt water to be injected are 350 barrels per day. NO other fluid or product may be injected into the proposed injection well without prior permission of the appropriate regulatory agency.

B. The maximum injection pressure at the injection well head will be less than 0.5 pig for each foot of sub-surface depth to the injection zone. An exception for this maximum pressure may be granted if the applicant presents sufficient evidence to justify the exception. The injection pressure shall be limited to that pressure which will not fracture the confining beds of the proposed injection zone, or cause movement of injection or formation fluids into fresh water zones. Estimated injection pressure is 750 psig. The actual volumes of salt water injected and well head pressure will be reported monthly on AOGC Form 14.

XV. A description of the method to be used for monitoring disposal system flows and pressures is to be included. This should contain a description of how such flow rates and pressures can be verified or checked for accuracy.

XVI. A drawing is attached showing the locations of the items below. The scale of the drawings should be clearly indicated and the approximate direct distance between producing wells and disposal wells specified on the drawing.

1. Connected
2. Holding Tanks (Show size)
3. Tank Batteries
4. Treaters, Gunbarrels
5. Piping (Show size and materials)
6. Separators
7. Pumps
8. Production Cut-Off Switches
9. Emergency Storage Facilities (Show length, depth, width or tank size in Bbls.)

(NOTE: See ADPC&E Guide for information on storage facilities.)

XVII. HOLDING TANK REQUIREMENTS FOR TRANSFER STATIONS
(See terminology list at end of Section XVIII for meanings of abbreviations.)

A. For DTV/DIV 0.4

1. If salt water can be transferred to the Main Disposal Station without the addition of mechanical head (pumps):

   a. MSR=100 BBL, or
   b. MSR=DTV (If DTV is 100 BBL/Day)

2. If salt water cannot be transferred to the Main Disposal Station without the addition of mechanical head (pumps):

   a. Automatic cut-off switches to producing wells connected to the Transfer Station are required. The cut-off switch must be situated on the Transfer Station salt water storage vessel to provide a storage capacity of equal to DTV/24 (BBLS.) above the cut-off level, or;
   b. MSR=DTV/4 (BBLS.) with a minimum storage capacity of 100 BBLS, or DTV (if DTV is 100 BBLS/Day.)

B. For DTV/DIV 0.4

1. Automatic cut-off switches to producing wells connected to the Transfer Station are required. The cut-off switch must be situated on the Transfer Station salt water storage vessel to provide storage capacity equal to DTV/24 (BBLS) above the cut-off level, or;

2. MSR=DTV/2 (BBLS) with a minimum storage capacity of 100 BBLS or DTV (if DTV is 100 BBLS/Day.)

C. If the Transfer Station is not connected to the Main Disposal Station by pipeline, i.e. salt water must be transported by truck, MSR=3 DTV (BBLS)

D. The Transfer Station salt water storage vessels shall be surrounded by an impermeable dike or firewall with a capacity equal to 1.5 times the volume of the largest vessel contained within the walls.

E. Any alternate system or design which meets the approval of the ADPC&E.

XVIII. HOLDING TANK REQUIREMENTS FOR MAIN DISPOSAL STATIONS

A. For IP/MP 0.4

1. If salt water can be disposed into the disposal well without the addition of mechanical head (pumps):

   a. MSR=100 BBLS, or;
   b. MSR=DIV if DIV 100 BBLS/Day

2. If salt water cannot be disposed into the disposal well without the addition of mechanical head (pumps):

   a. Automatic cut-off switches to producing wells connected to the Main Disposal Station are required. The cut-off switch must be situated on the Main Disposal Station salt water storage vessel to provide a storage capacity equal to DIV/24 (BBLS) above the cut-off level, or;

   b. MSR=DIV/2 with a minimum storage capacity of 100 BBLS, or DIV (if DIV 100 BBLS/Day).

B. For IP/MP 0.4

   1. Automatic cut-off switches to producing wells connected to the Main Disposal Station are required. The cut-off switch must be situated on the Main Disposal Station storage vessel to provide a storage capacity equal to DIV/24 (BBLS) above the cut-off level, or;

   2. MSR=DIV/2 with a minimum storage capacity of 100 BBLS, or DIV (if DIV is 100 BBLS/Day).

C. The Main Disposal Station salt water storage vessels shall be surrounded by an impermeable dike or firewall with a capacity of 1.5 times the volume of the largest vessel contained within the walls.

D. Any alternative system or design which meet the approval of the ADPC&E.

TERMINOLOGY

D--Sub-surface depth to the top of the injection one as listed in Section I of the permit application.

DIV--Estimated maximum amounts of salt water to be injected daily as reported in Section XIV (A) of the permit application (BBLS.).

DTV--Amounts of salt water transferred daily from production separators to the Transfer station. (BBLS)

IP--Estimated injection pressure as listed in Section XIV (B) of the permit application (psig). If this pressure is less than or equal to 1 psig, a value of 1 psig shall be used in the calculation of the minimum required storage.

Main Disposal Station--The site, in the construction and operation of a SWD system, utilized for the final collection and storage of produced salt water prior to the disposal by sub-surface injection.

MP--Maximum allowable well head pressure, equal to 0.5 psi per foot of sub-surface depth to the injection zone (0.5 D, psig)

MSR--Minimum required storage, as calculated by the appropriate formula (BBLS)

Transfer Station--A site shall be considered a Transfer Station if produced salt water cannot be transferred directly to the Main Disposal Station from the production separator, i.e. a salt water storage vessel is connected at the site.

-- Less than

-- Greater than or equal to

XIX. A copy of the Spill Prevention Control and Countermeasures (SPCC) plan for this system must be available for inspection upon request.

I, Morgan P. O'Brien,

do certify that the information presented within this application and all attachments are to the best of my knowledge and belief, true, correct and complete.

Signature of Applicant	Title	Date Application
Morgan P. O'Brien	Executive Vice-President	7/18/91

MAIN DISPOSAL STATION REQUIREMENTS

@ 100 barrel minimum or DTV if < 100 BBL/Day.

* Salt Water Storage Tanks must be surrounded by impermeable firewalls capable of holding 1.5 times the volume of the largest tank enclosed within the dike walls.

The cut-off switch must be situated on the salt water storage tank to provide a storage capacity equal to DTV24 (BBLS) above the cut-off level.

TRANSFER STATION REQUIREMENTS

@ 100 barrel minimum or DTV if < 100 BBL/Day.

* Salt Water Storage Tanks must be surrounded by impermeable firewalls capable of holding 1.5 times the volume of the largest tank enclosed within the dike walls.

The cut-off switch must be situated on the salt water storage tank to provide a storage capacity equal to DTV24 (BBLS) above the cut-off level.

CUSTOMER OR HIS AGENT WARRANTS THE WELL IS IN PROPER CONDITION TO RECEIVE THE PRODUCTS SUPPLIES MATERIALS, AND SERVICES

As consideration the above named Customer agrees THIS CONTRACT MUST BE SIGNED BEFORE WORK IS COMMENCED

a) To pay Halliburton Reservoir Services (hereinafter called Halliburton) in accord with the rates and terms stated in Halliburton's current price list Invoices are payable NET by the 20th of the following month after date of invoice Upon Customer's default in payment of Customer's account by the last day of the month following the month in which the invoice is dated Customer agrees to pay interest thereon after default at the highest lawful contract rate applicable but never to exceed 18% per annum In the event it becomes necessary to employ attorneys to enforce collection of said account Customer agrees to pay all collection costs and attorney fees in the amount of 20% of the amount of the unpaid account

b) To defend indemnify release and hold harmless Halliburton its divisions subsidiaries parent and affiliated companies and the officers directors employees agents and servants of all of them from and against any claims liability expenses attorneys fees and costs of defense to the extent permitted by law for

1 Damage to property owned by in the possession of or leased by Customer and/or the well owner (if different from Customer) including but not limited to surface and subsurface damage The term well owner shall include working and royalty interest owners

2 Reservoir formation or well loss or damage subsurface trespass or any action in the nature thereof

3 Personal injury or death or property damage (including but not limited to damage to the reservoir formation or well) or any damages whatsoever growing out of or in any way connected with or resulting from pollution subsurface pressure losing control of the well and/or a well blowout or the use of radioactive material

The defense indemnity release and hold harmless obligations of Customer provided for in this Section b) and Section c) below shall apply to claims or liability even if caused or contributed to by Halliburton's negligence strict liability or the unseaworthiness of any vessel owned operated or furnished by Halliburton or any defect in the data products supplies materials or equipment of Halliburton whether in the preparation design manufacture distribution or marketing thereof or from a failure to warn any person of such defect Such defense indemnity release and hold harmless obligations of Customer shall not apply where the claims or liability are caused by the gross negligence or willful misconduct of Halliburton The term Halliburton as used in said Sections b) and c) shall mean Halliburton its divisions subsidiaries parent and affiliated companies and the officers directors employees agents and servants of all of them

c) That because of the uncertainty of variable well conditions and the necessity of relying on facts and supporting services furnished by others Halliburton is unable to guarantee the effectiveness of the products supplies or materials nor the results of any treatment or service nor the accuracy of any chart interpretation research analysis job recommendation or other data furnished by Halliburton Halliburton personnel will use their best efforts in gathering such information and their best judgment in interpreting it but Customer agrees that Halliburton shall not be liable for and Customer shall indemnify Halliburton against any damages arising from the use of such information

d) That Halliburton warrants only title to the products supplies and materials and that the same are free from defects in workmanship and materials THERE ARE NO WARRANTIES EXPRESS OR IMPLIED OF MERCHANTABILITY FITNESS OR OTHERWISE WHICH EXTEND BEYOND THOSE STATED IN THE IMMEDIATELY PRECEDING SENTENCE Halliburton's liability and Customer's exclusive remedy in any cause of action (whether in contract tort breach of warranty or otherwise) arising out of the sale or use of any products supplies or materials is expressly limited to the replacement of such products supplies or materials on their return to Halliburton or at Halliburton's option to the allowance to the Customer of credit for the cost of such items In no event shall Halliburton be liable for special incidental indirect punitive or consequential damages

e) That Customer shall at its risk and expense attempt to recover any Halliburton equipment tools or instruments which are lost in the well and if such equipment tools or instruments are not recovered Customer shall pay Halliburton its replacement cost unless such loss is due to the sole negligence of Halliburton If Halliburton equipment tools or instruments are damaged in the well Customer shall pay Halliburton the lesser of its replacement cost or the cost of repairs unless such damage is caused by the sole negligence of Halliburton In the case of equipment tools or instruments for marine operations Customer shall in addition to the foregoing be fully responsible for loss of or damage to any of Halliburton's equipment tools or instruments which occurs at any time after delivery to Customer at the landing until returned to the landing unless such loss or damage is caused by the sole negligence of Halliburton

f) To waive the provisions of the Deceptive Trade Practices - Consumer Protection Act to the extent permitted by law

g) That this contract shall be governed by the law of the state where services are performed or materials are furnished

h) That Halliburton shall not be bound by any changes or modifications in this contract except where such change or modification is made in writing by a duly authorized executive officer of Halliburton

I HAVE READ AND UNDERSTAND THIS CONTRACT AND REPRESENT THAT I AM AUTHORIZED TO SIGN THE SAME AS CUSTOMER'S AGENT

INSTRUCTIONS

This certificate shall be executed and filed in triplicate with the Oil and Gas Commission, El Dorado, Arkansas, covering each lease from which oil and/or gas is produced A separate certificate shall be filed for each purchaser authorized to purchase oil and/or gas from a lease

After said certificate has been approved by the Arkansas Oil and Gas Commission one copy shall be returned to the Operator, one copy forwarded to the Purchaser, and one copy retained by the Arkansas Oil and Gas Commission

A new certificate shall be filed to cover each change in operating ownership and each change in purchasers

This certificate when properly executed and approved by the Arkansas Oil and Gas Commission shall constitute an authorization to a pipeline or other carrier to purchase oil and/or gas from the lease named therein and shall remain in full force and effect until

(a) Operating ownership changes, or

(b) The Purchaser is changed, or

(c) The authorization is cancelled by the Arkansas Oil and Gas Commission

If any of the rules and regulations of the Arkansas Oil and Gas Commission have not been complied with at the time this report is filed, explain fully under the heading "Remarks"

In all cases where this certificate is filed to cover a change in operating ownership or a change in the purchaser designated to purchaser oil and/or gas, show under "Remarks" the previous owner or operator and the purchaser previously authorized to transport the oil and/or gas
