Jim,

Here is one of the survey's we performed on RR Ties in the radiologically impacted Parcel E Scrap yard. This is not a free release survey but a scoping survey since the RR ties are being disposed of by ITSI. RASO has deemed this level of survey is adequate to insure that no radiological contamination is being disposed of in a CA landfill.

We use this form and survey the ties in groups, each tie is surveyed using a meter (Model 2360 with a 43-68 probe) and one swipe sample is collected per tie. We have our RSO review and approve and we file it away.

Let me know if you have any questions.
