For your information, I am providing you a paper entitled *"Advancing the Next Generation of Risk Assessment"* that will be submit for publication in the near future. Pleased do not circulate as this is a prepublication version. The paper summarizes findings first reported in the EPA NexGen report. I want to thank all of you for your suggestions and help over the 4 years of this effort and look forward to your continued involvement as we move forward to implement steps articulated in the paper and report.

We are moving ahead in a number of area to bring on line new more efficient health assessment approaches. For example we are using bioinformatic approaches to: develop mode of action/adverse outcome pathway analyses; identify human polymorphisms that may alter disease risks; and identify mechanistic interaction among various environmental stressors.

Please call me if you have any questions.

Ila Cote, PhD
Senior Science Advisor
US Environmental Protection Agency
National Center for Environmental Assessment (8623P)
