Has PG&E received enough information to start up their design again? They have told us they are stopped until they get the information from the SFRA.

Please confirm.
Thank you,
Patricia

Subject: Bldg. 606 Utilities

Hello -

Yesterday I met with SFPD (Planning Division) and contacted Wilfred during the meeting to address his load questions. SFPD confirmed with DPW's
engineer that the primary service to Bldg. 606 is 4,000 amps. I've
e-mailed Ashur Yoseph to get a copy of the form pertaining to load requirements and will pass that along to SFPD when received.

AM PST)

There is no reason that SFRA should not be able to provide this load information to PG&E this week. If it is not provided, the SFRA is directly delaying the cleanup of Parcel 49. The Task Force knew what PG&E wanted so they should assist with this so it can be done this week.

Please provide a status on this as soon as possible.

Thank you,
Patricia

Marta,

Per our phone conversation, until PG&E receives the correct load information for the SFPD SWAT aka building 606, we cannot complete the estimate. We need to correctly size the faculties, protection, etc.

-Wilfred

Wilfred,

E-mail below from Marta has the load info from SFPD Bldg-606.

I also spoke with Bill from Tetratech and he said that the service to
Bldg-439 does not need to be restored. They'll submit a separate application if there is a need in the future.

Mel

Hello Patricia,

Below is the information that I received from SFPD. I can't locate Will's e-mail address. Would you mind sending it to me or forwarding this e-mail to him?

The current service is 4000Amp. The building is drawing approximately half of it's rated service.
In order to supply the building (entire) with a generator we would need one with a 1200kw rating.

Thank you,
Marta

Patricia,

I received the information regarding the loads for Bldg. 606 from SFPD.
Do you want me to send them directly to you?

Thanks,
Marta
