Subject: IRIS Cooperative Research and Development Agreement (CRADA)

Dear Administrator McCarthy

I enjoyed speaking with you briefly at last week's Science Advisory Board meeting. Attached is an example of a cooperative agreement to which I referred in my question to you regarding the Integrated Risk Information System (IRIS). Other arrangements are possible, of course, and maybe even preferred. In brief, the develop one or more Cooperative Research and Development Agreements (CRADAs) under the Federal Technology Transfer Act with outside parties would allow a dramatic increase in the output of IRIS, even to a level of 125 to 150 assessments per year. IRIS staff tasks would shift more to be guardians of the system, rather than as primary developers of the information.

Sincerely,
