Subject:	May 16 Frisco Lead data
Date:	Thursday, May 30, 2013 5:16:28 PM
Attachments:	Exide data May 16-13.xlsx

Attached is the May 16th ambient lead monitoring data for the Frisco area. The monitor with the highest reading was the Eubanks monitor, with a reading of 0.1150 micrograms per cubic meter. The wind speed was between 2.5 to 10.8 miles per hour, with a maximum wind gust of 20.9 mph. The wind direction was mainly from the Southeast by south to the south by west.

On May 16th, Exide and its contractors were conducting decontamination, and demolition activities at the site. Work started at 7:00 a.m., going until 11:30 a.m.; started back up at 12:30 p.m., and finished at 4:46 p.m., with two short breaks in between. Lead/cadmium sampling was conducted on this day by the Exide contractor. Monitoring was conducted for approximately 10 hours. One of the monitors nearest the Eubanks monitor had a reading of <0.17 micrograms per cubic meter. Note that the value was listed as; “This testing result is less than the numerical value.”
