Subject:	April 10th lead data
Date:	Wednesday, April 24, 2013 10:46:46 AM
Attachments:	Exide data April 10-13.xlsx

Attached is the April 10th ambient lead monitoring data for the Frisco area. The monitor with the highest reading was the Stonebrook monitor, with a reading of 0.0794 micrograms per cubic meter. The wind speed was between 4 to 13.9 miles per hour, with a maximum wind gust of 24.1 mph. The wind direction was from the north-northwest to the north.

On April 10th, Exide and its contractors were conducting decontamination and demolition activities at the site. Work hours were from 7:10 a.m. to 7:28 a.m., 7:50 a.m. to 8:03 a.m., and 9:00 a.m. to 10:03 a.m. Demolition activities were suspended at 10:03 a.m., due to heavy rain and continued high winds. Exide's contractors conducted lead monitor for approximately 10 hours. The monitors nearest the Stonebrook monitor had readings of <u>less than</u> 0.17 and 0.18 micrograms per cubic meter (Note that the value was listed as: "The testing result is less than the numerical value").
