We understand and appreciate the opportunity you've given us. We are meeting internally to sort out our schedules for public meetings during the Proposed Plan comment period and will get back to you next week with an answer. Thanks for your patience.

Hi Alice and David - I strongly second Gabriela's request.

All consideration of this request would be appreciated. Alice - the CAC members still reference the presentation you gave previously - with their thanks.

This is an important opportunity and will require - I believe - little preparation beyond what you already have prepared . If you have questions - of course don't hesitate to contact me or Gabriela.

Many thanks. Peter

Subject: Presentation about Passaic River proposed cleanup for HEP?

Hello Alice and Dave,

Many Harbor & Estuary partners (particularly our Citizens Advisory Committee) are really interested in a presentation about EPA's proposed cleanup for the Passaic. Would you be available to give a presentation? We thought we would extend the invitation to our Program partners (members of work groups and committees) and, possibly, to our broader communication list. It could be either a webinar, or a face-to-face presentation with webinar option. Regarding timing, I'm thinking maybe the week of May 19th.

Please let me know if this may be feasible. This is something our CAC has been asking about for a while, and our Program and partners would greatly appreciate.

Thank you in advance for your time and help!

Gabriela.
