Hello all

Do we have a meeting set up to discuss the run down of the agenda - the status of the TASC, etc. for the CAG meeting? Can we confirm the meeting on the 14th.

I thought that we could ask Alice to give us an update on the FFS and model - although not a full presentation atleast a hint of where they're headed.

> Yes…we should add CPG to the Nov agenda. They indicated they would present on their model and if EPA approved allowing the release of the sampling results without QA/QC they would present those as well. I spoke to Ray Basso last week to check in and he said that he would be at the meeting to provide some response to the CPG presentation.

I did not mean that to sound like just Debbie, I meant the four of you and whoever else makes sense to include.

We also are expecting to hear from the CPG as you saw in previous emails an should discuss the range of things we expect to hear from them and any EPA concerns about what they will be sharing about their model.

thanks

Doug

Hi, I was waiting to contact her until I got a better sense of the TASC status. Looks like we are either going to have way too much or way too little to talk about in November.

If she is okay with waiting that is fine with us, but rescheduling will depend on the timing of the rest of the FS stuff.

It might be helpful to have a conversation this week with you and whoever else makes sense from EPA to go over our calendar and make sure we are making sense here.

thanks

Doug

I ran into Lisa Baron/Army Coprs last week and while she would like to get time in the near future to present on the restoration opps, she would not be too dismayed if she was not on the agenda for November. Shall I confirm with her that she is NOT on the Nov agenda, but perhaps Dec or Jan??

HI, we actually assumed that you would not be ready in November, we are looking at November as just a chance to catch up overall and get TASC re-engaged. Not sure how well we will be able to even do that.

Base on our discussion last week, what we have on the agenda for Nov 14 is the following:
-Overview of the FFS, we have learned to date, what is coming up -Review TASC tables
-10.9 Update
- Outreach committee-what the community needs

We obviously will need EPA's help in providing the overview. We are waiting to here whether it will be possible to have TASC there or not.

Attached is our latest strategic plan, very much in flux as we wait to here everyone's schedule.

thanks,
Doug
