Subject: Passaic River TASC support; my current understanding

SKEO produced a couple of products and was prepared to present to the CAG in April as well as develop a fact sheet for that meeting. Contract issues and cancelled CAG meetings resulted in a pause in activity. I discussed the following with Wanda and checked some of the historical emails. Let me know if I have this correct or not:

Summary Tables:

- January 2013 SKEO prepared draft tables as requested. Two tables were initially prepared. One which summarized dredging options and one which summarized similar cleanups. The draft tables were submitted to CAG leadership on Feb 21.

- Skeo revised the table to include a third table on disposal options and presumably incorporate comments from the CAG? That table is dated March 12, 2013 and was distributed to the CAG by Doug on March 13

- I have no record of any other comments received on the tables or subsequent versions.

Review of CPG comments on the FFS to the NRRB:

- On January 16 SKEO submits to EPA and CAG leadership their review comments on the CPG's November 2012 letter to the NRRB regarding the FFS

- On March 25 Passaic River Coalition submits a response to TASC review of the CPG letter/positions

SKEO presentation to the CAG:

- Terri Boguski with SKEO was prepared to make an overview presentation at the CAG's April 2013 meeting, along with a fact sheet summary.

- April 11 CAG meeting was cancelled, around the same time that SKEO's contract status and travel ability was questionable

- SKEO stands ready to give a summary presentation to the CAG upon request.

- Wanda Ayala and I will work with HQ and Kirby Webster with SKEO to update a technical work directive once we hear from the CAG leadership on specific dates for SKEO presentation and/or products, e.g., fact sheets to prepare

Let me know if I got anything wrong and how we can re-engage the support. Thanks

David Kluesner
