Thanks Alice. Thanks for your very helpful information which I have distributed internally. Would it be correct to call the Lower sixteen miles of the river a designated Superfund site? Thanks again, Tirza

We are required to provide a 30 day period for public comments. Then, if there is a request for an extension then we tend to grant it. In this case, the documents are fairly extensive, so we thought a 60 day public comments period right off the bat would be appropriate. I'm not sure what we will do if we still get a request for an extension - we will have to review the reason for the request.

O.K. Thanks. Is the 60 day period for public comments statutory or is that subject to extension?

No, there is no required amount of time. It depends on the number and type of comments we get.

Alice, thanks so much.

Is EPA required to assemble its Response to Comments and issue an RAD within a certain amount of time? Staff is requesting a timeline on expected next steps in the process.

Thanks again, Tirza

It was nice to talk to you just now. Here is my presentation from last week. Next e-mail I send will be Doug Sarno's original e-mail conveying some documents you may be interested in.

Also, you will find these documents on ourPassaic.org, in the Digital Library (bottom of the left hand stripe of topics on the home page), under "Public Outreach Documents", "Public Outreach\Community Advisory Group".

Subject: Follow up to CAG meeting on Lower Passaic River

Hi Alice, I recently joined The Trust for Public Land and was at yesterday's CAG meeting on the Lower Passaic River. I would like an idea on expected time frame on the FFS after it is issued. How long until it becomes a Record of Decision? I assume the parties have a right to challenge the ROD. I will follow up this email with a call to your office on Monday.

Thank you for an excellent presentation.

Sincerely,

Tirza Wahrman, Esq.
