I believe Doug had proposed talking next Monday 4/29, but I never heard back from him on time.

Are we talking today about the CAG schedule and agenda?

If not, what dates might work.

We need to know whether to reserve the St James space for May if we are making it an executive meeting - maybe we can have it at an ICC office - or we can keep it at St James - we just have to tell the other folks that its a closed meeting?

Thanks

Ana

Hi EPA,

Ana, Debbie and I chatted today about where to go from here given that the FFS is now on a fall time schedule. We want to keep up the momentum while not having meetings without much

substance to talk about. We also don't want to continue this practice of canceling meetings.

so, here is the proposed schedule from our perspective:

May 9, Executive meeting of the CAG (not publicly noticed), to discuss the CAG Approach to discussing and commenting on the CPG, what information will be available and what questions do we want to be asking and how can we make the best use of TASC (hopefully TASC can attend as well)

July 11, Tour of the RM 10.9 project, basic updates

September 12, return to monthly meetings, get updated CPG presentation and modeling results, review FFS materials that we have in hand and available TASC products, EPA modeling results, etc…

We would like to schedule a call with you to discuss this overall approach and what makes sense from your point of view on schedule on Monday April 29 if you have availability, we are all pretty flexible that day. Let us know if that will work.

Also do we know the status of the TASC rebid?

thanks

Doug
