Okay and thank you.

Quick question for you, do you know a number or contact from the state because our flood insurance denied us stating they don't believe the water was so high.

Thank you again.

Rich, good to hear from you, I am working on getting some sampling done in Lyndhurst, more likely in common areas as opposed to individual residences. We believe that the results from these common areas will be representative of what nearby residences would have received from river floodwaters. Should have a more information for you in about a week. Take care, talk to you soon.

Good afternoon Ray.

We spoke at the recent meeting in Lyndhurst (01/17/2013).

If you would be so kind, I would like to get my property checked. I believe that our property is contaminated. i have three children who have recently been complaining of head aches and other issues. We were flooded with the Passaic River.

I can be reached at Ex. 6 - Personal Privacy

Thank you and I look forward to hear from you.
