   - T&D, Stabilized material and filtered water
   - Air and water quality monitoring
6) Community Interaction
   - Any issues/comments

Last week

Dredged Mon + a little of Wed. + Saturday
a little Friday

Volume ~2,150 cY as of 8/10 (Reporting Mon-Sunday)

~650 tons (incl. 10% portland cement) processed at CC

61,900 gallons of water treated

Water - collecting transect/TSS

Air - no trigger hit (except at one location that's getting false positives, from another H_2S source)

Core results ~ by end of week

As of today (8/13)
- All 3 barges are at 10.9
- Bridges shut at least through Thursday

Update - old motor has been disconnected, dropping new motor in today.

- T+D → first intermodals loaded out today, water will also be transported today
