Subject: RE: DRAFT: Pollinators and CLA's regulatory conference

Hi Ray

Marietta and I are generally fine with the topics listed below.
I will let her chime in on who should be covering which topic regarding risk assessments and research.

Regarding the MP3s and the acute mitigation policy, I can cover the status/implementation of the policy.
For the evaluation of MP3s, I think someone from the PPDC workgroup on MP3 metrics would be the right person to discuss this topic.

For MP3s – progress and implementation, this may be a difficult topic to cover. While AAPCO has agreed to provide status information on the development of MP3s for states, I am not sure who/how to communicate their implementation considering the various stages of development and scope by state. Again, the purpose of the PPDC workgroup was to find an approach to evaluate their collective effectiveness going forward. Rather maybe some successful efforts from specific states on MP3 development/implementation may be a good way to talk about this topic.

Subject: DRAFT: Pollinators and CLA's regulatory conference
Importance: High

Marietta & Michael:

We have reserved a session at our spring regulatory conference (April 26 & 27) for pollinator topics. We would appreciate your input on topics that you (the Agency) would like to cover, and would like to see industry cover. We would like to decide on a session title this week, which can be fairly general to cover a range of topics. The actual topics and speakers can be decided subsequently. Could you react to the following list of possible topics – yes, no, neutral? Please feel free to suggest others.

- MP3s – progress and implementation
- MP3s – evaluating their success
- Status of acute tox mitigation
- Update on honey bee risk assessment
- Pollinator Research Task Force update

- Applicability of risk assessment to non-Apis bees.
