Subject: RE: Passaic River RM 10.9: Final Armor Layer Survey Technical Memorandum

John,

Thank you for providing the Armor Layer Survey Technical Memorandum.

EPA has reviewed the memorandum and has the following the comments/requests:

1. The long-term monitoring plan for RM10.9 should include a component to plot and record the settlement data for each of the 4 plates over time until cap elevation has settled to the pre-dredge elevation. Periodic long term measurements should be made until the cap settlement stabilized. Frequency of measurements will be further evaluated upon the CPG's submission of a long-term monitoring plan for RM10.9.

2. Please provide EPA with the raw survey data that is GIS compatible for further review.

Feel free to give me a call or schedule a time to speak if you would like to discuss further – 212-637-4328.

Thanks in advance,

Jennifer LaPoma
