Mike,

Stan is driving and asked that I send you this email. Would it be possible to replace the southern air station (PMS #2 South) with the air station running off a generator in the more central location of the park where you have asked for the third location?

Thank you for your time and consideration,

Roger

Stan,

Thank you for the clarification, but it won't change the end result. I makes sense to collect upwind.

Good luck with the bridges.

Mike

Subject: Clarification

Mike, when we were in the Park today, I mentioned that I thought the floating air monitoring station was going to have samplers on it for COPC's. You thought it wasn't. Turns out that on the River-based floating station, there will be 1 PUF sampler and 1 PQ-100 sampler run by a generator. Not sure if that clarification will affect your request for a third COPC sampling station on land that we discussed today.
