Subject: RE: High Volume sampling - splits?

Rob, Bill and Kristen,

We understand the next hv sampling has been scheduled for next week. We would like to schedule a call to discuss logistics and oversight issues (either tomorrow Wednesday from 9-11 or Thursday afternoon from 2-4). At the June 5 between EPA and CPG at K&L meeting you had mentioned there were issues with the data from the first sampling event. Are you going to send us an email detailing the issues that you identified? Note that the CPG results from the first round of high volume chemical water column monitoring (HV-CWCM) samples collected in January 2013 and posted on SharePoint March 25, 2013 are identified as draft preliminary and a review of the EDD indicates that the data have not been validated, therefore the EPA has not been able to do a complete review of the data.

I also want to let you know that I will be out of the office the next two weeks (and not sure I'll be checking email daily), please contact Stephanie, Ray or Alice if there are any issues regarding sampling in the Bay during my absence.

Thanks,

eugenia

Subject: High Volume sampling - splits?

AmyMarie and George,

AECOM will conduct the second High Volume sampling next week. The schedule is below:

Day	Proposed Date	Boat	Station	Vessel
Day 1	24-Jun	Boat 1	NBS	West Cove
		Boat 2	NBNE	Osprey
Day 2	25-Jun	Boat 1	KVK	West Cove
		Boat 2	Equipment Blank	Osprey
Day 3	26-Jun	Boat 1	RM4.2	West Cove
		Boat 2	RM10.2/13.5	Osprey
Day 4	27-Jun	Boat 1	Equipment Blanks	West Cove
		Boat 2	Dundee Dam	MustDu

Please advise if and where EPA would like to collect a split sample from LPR and from Newark Bay. EPA can split wherever we are using the West Cove (2 teams will be working on the West Cove).

At this time, we do not have room on the West Cove (maximum 6 passengers and that's 2 Gravity and 4 AECOM), but we can tie up or come close as we did before.

Once we have your split locations, we can provide sample IDs.

Kristen Durocher
