Subject: RE: Upcoming High Volume Event - Week of June 24

Thanks Rob. EPA is reviewing the data posted from the first Large Volume sampling event and we are planning to do oversight and collect split samples for the week of June 24. If we need to discuss the past event's data set, please send us an email with the issues that you had identified/mentioned last week.

Thanks,

eugenia

Subject: Upcoming High Volume Event - Week of June 24

Eugenia and Stephanie:

The CPG is planning to implement the second volume event in late Jun in advance of the RM 10.9 Removal Action and the SSP 2 work; otherwise the event would have to be delayed until late in 2013. The data from the first event was posted to the EPA's LPR sharepoint in March. There was some discussion about EPA and its contractors reviewing and discussing the data with the CPG in advance of this High Volume event. Please provide times when the EPA and the CPG can discuss this week or early next when this discussion could occur. The CPG has commitments from its contractors for the week of June 24.

Thanks

R/

Rob
