Subject: Reservoir Mercury Project
Attachments: ATT00001.txt

Hi Dave,

I would like to meet with you, your team, Water Board project staff, and several Water Board executive staff to discuss the reservoir mercury project. We would like to discuss options for moving forward with this project, which include a program of implementation focusing on in-reservoir methylation pilot studies or a more traditional TMDL.

Who from EPA would you like us to include in the meeting? Also, please let me know if there are any dates in late-April or May that we should avoid. I suspect it will be a small challenge to find time when we are all available.

Thanks,
Rebecca
