Hi George,

Thank you for providing the list of split samples. Please let us know how much mass will be required for each laboratory per sample (including the additional mass for QC samples).

We do not have a schedule in place to start the compositing and homogenization (at Alpha Analytical) because it was our understanding that were still waiting for official approval of the compositing plan. However, we have started coordinating with Alpha Analytical and they are looking into feasible dates for late March or early April. We will continue to coordinate with you as we know more.

Thanks,

Jennifer Parker

Subject: Background fish split samples

Hi Jennifer,

CDM Smith reviewed the proposed background tissue analysis and compositing plan, and came up with a tentative list of split samples. Please see the attached file.

We understand, due to mass requirements, that some things may change once weights of carcass and fillet composites are final , but as a courtesy wanted to provide Windward with this list.

Please let me know if you have any questions, and it would be appreciated if you can provide CDM Smith with a tentative schedule at your earliest convenience so we can work out logistics etc.

Thanks

–gm
