---

HI Andy – Since the GMP monitoring has not been set yet – should the GMZ figure include their former/proposed monitoring on it? I think they should be able to just have a GMZ map which outlines that it surrounds the contamination found rather than a GMZ map which includes their proposed monitoring but no indication of contamination. I am not sure the purple notations are correct in that it notes sampled in the past – but that is not connected to the current situation. It could say sampled in 2018-2019. Past data was spotty, clean, and from what we now understand – the houses we should have looked at were not sampled. I am asking because I am not sure if this map is also mailed to residents?
