Subject: US EPA Carver Elementary Inquiry

Hello Ms. Cargo,

Nice to hear from you. I apologize for not responding earlier. Attached are some records you might find useful, if you would like more information you can feel free to give me a call.

1. Attached are copies of the soil sampling reports that was voluntarily conducted by the school district. It is publicly available information that could be obtained through a Freedom of Information Act request.
2. Attached is some information I found from state archives on historical drilling in the surrounding area. I recommend checking DOGGR's database of oilwells for more information. http://www.conservation.ca.gov/dog/Pages/wellfinder.aspx
3. Attached is a SCAQMD Complaint report from an SCAQMD inspector that visited Carver Elementary.
4. Attached is a letter from the local natural gas utility company that details their records of natural gas lines near Carver Elementary. There are no high pressure lines within 1,500ft of the school.
5. Attached is a summary letter written by DTSC detailing US EPA and DTSC's work on the community concerns raised by yourself and Ms. Suwol.

Thank You,

-Eric
