The second page of the profile with the signature didn't come through, can you rescan?

Evan:

Please get these to Republic ASAP.

Thanks
Gary Moore

Thanks. Also remember that Republic won't accept electronic signatures so you'll have to print and scan

> Gary, after reviewing the profile that Don submitted for the Class II soil (attached), we did not have a state waste code on it. Republic then replied to us and said we needed the state waste code, but I just explained to Chris again that isn't required for Class II waste. He wasn't sure why it was rejected then, but I'm guessing it's because we classified it as an Industrial Process Waste instead of Pollution Control Waste. This was my oversight, Don had it correct on the draft he sent me and I changed it thinking it was industrial. So attached is the profile with the waste checked as Pollution Control Waste. I'll let Republic know in an email that was an error and the waste meets the definition of a Pollution Control Waste. It might help if you can add me to the 3rd party authorization form so I can send that to them when I respond. Sorry about the hassle, call with questions.
