Subject: Re: {External Sender} Daily updates/exchange of contact information

You should stake these wattles as they are intended to knock out sediment depending on the amount of flow you receive. Should be staked in the ditch and outside the ditch.

> Dodie we discussed earlier today Gary would like to receive daily updates on the progression of the cleanup at the facility. He would really like to be informed of what's going on outside of the facility, as well as the cleanup inside. I was not allowed to go inside, as you know, so what we discuss during the morning meetings is really all I have been able to relay to him. If you could start doing this, it would be greatly appreciated as I will then, more than likely, only make a few short visits next week versus daily ones.
