Subject:	Former Benchmark Site Historical Reports
Date:	02/29/2012 05:14 PM

SZ-South Project Team,

In accordance with USEPA's request in their letter dated 9 February 2012, Orion has made the historical Benchmark and SZ-South reports available on an ftp site for your reference. As requested, CDs have also been sent to USEPA and CH2M Hill. Directions for accessing the ftp site will be sent from rchiem@orionenv.com. Please note that all historical soil, soil vapor, and groundwater analytical results were previously submitted in Excel format via email to CH2M Hill on 24 February 2012.

At this time, these are all of the reports that have been located in Northrop Grumman's and Orion's historical project files. You will be notified if any additional reports are located in the future and we will make them available to the project team.

Please contact me if you do not receive an email with access to the ftp site or if you have any issues or questions.

Thank you,
Mike
