Subject: Worker qualifications
Date: Thursday, May 23, 2013 4:53:01 PM

Jon,

All workers have 40 hour Hazwoper training and medical physicals. The field construction manager is Ed Jakubowski. Ed is a qualified site safety officer, and will be responsible for the air monitoring for mercury and VOC's. Bill Schnitzerling is the project LSRP. I will call you next week to discuss the split sampling and the logistics of the oversight to prepare for the eventual excavation at the south east end of the site.

regards,

Charles E. Terbot, PMP

Subject RE: LCP Access

Chuck you can enter the site to lay down the cement blocks and to begin setting up the staging areas. Please keep to the areas described in the AOC and do not enter the fenced in areas (i.e., the area with the deteriorating bldgs.). And do not disturb or remove any soil or other debris. Lastly, all workers must have the appropriate level of H&S training for the work they plan on performing.

Jon

Subject: LCP Access

Jon,

Starting next Tuesday one of the 3 operators on my construction crew and a laborer or two will need some work to keep them busy. Is there any way we can gain access to the LCP site and coordinate oversight to start setting up the staging areas and begin to set the concrete blocks on the track base? Let me know what can be worked out, and thanks for all the help getting the AOC finalized.

regards,

Charles E. Terbot, PMP
