Subject: Hi steve - another question on Grumman OU-1

Carol,

EPA: Hi Steve - I was asked whether operation of the ONCT was covered under the Order for grumman OU-1.

DEC: All the work was done under the RIFS order signed in 1990 or 1991. Out of this RIFS, the DEC issued two Records of Decision, one for soils and one for groundwater, which ultimately became OU1 and OU2. The Northrop Grumman Groundwater Interim Remedial Measure (IRM) was designed under the original RIFS order and ultimately became known as the OU2 Onsite Containment System after the DEC Groundwater ROD (OU2) was signed and it then became part of the final Remedy.

(I saw that evaluating its effectiveness was covered under the ROD for OU-2, but I was wondering if the actual operation was covered under the OU-1 ROD or Order? thank you. :-)

Thanks,

Steve
