Carol,

What you have is what we have. Nothing new since the water district decided in the middle to change their carbon. Will keep you posted.

Thanks,

Steve

Hi Steve and Henry - I noticed that the most recent sampling data I have is from week #6, which was collected on April 29th. I also saw Lora Fly's monthly report that says 'Discontinue 3 month capture zone analysis study @ BWD Plant 6 due to carbon change-out.' When you have the chance, pls drop me a line regarding when the most recent data was collected and whether the system is currently off-line?

Thanks,
Carol
