Subject: RE: site control and preservation of evidence for failure of the tank

Melissa:

Dennis spoke with someone from CID in the Charleston office. I forget his name and don't have my notes with me. Dennis can notify his contact.

Thanks,

Fran

Hi Fran,

I don't know if CID has any interest in the tank or situation at Freedom Industries, but Chemical Safety Board let us know that they have sent a document to the US Attorney Generals Office for the site control and preservation of evidence plan. To guide how Tank 396 will be cut apart.
