Consequences of the Evolution of Control and Production Technology in the Denver Ozone NAA.pdf
APCD BLM Eastern Colorado DRMP-EIS Comments 11-APR-2018(1).docx

Gail,

I think these analyses do address the magnitude of the reductions since I look at the trend in the percent reduction from the base year and not just the trend in emissions vs the trend in concentrations.

FYI. The BLM document is an update to the inventory/6-9 AM Plattville VOC precursor data time series. Note that the update is normalized to 2015, while the Acrobat Paper time series is normalized to 2012.
