West Virginia Agency Approves Freedom Industries' Tank Removal Plan

West Virginia's Department of Environmental Protection announced that it has approved Freedom Industries' initial Tank Decommission Plan for its Charleston, W.Va., facility, from which a chemical spill on Jan. 9 into the Elk River contaminated the potable water supply for 300,000 people living in West Virginia... more

News Update

Smarter Nutrient Management for Water Utilities Examined

In the past century, population growth, urbanization and intensified agricultural practices have combined to increase strain on wastewater treatment facilities. A foremost challenge for utilities is managing nutrient levels in the water - and doing so while juggling economic and energy constraints....more

Global Warming and Potential Water Contamination Resulting from Fracking for Hydrocarbons: A Relationship?

Contaminated water, presumed to be from drilling into and fracturing (fracking) hydrocarbon-bearing rock strata, has been in the news for some time now. And so have global warming and air pollution issues associated with transporting and burning fossil fuels. Are these headliners connected? Of course.... more

Silicone Hose - Get a Complimentary Sample

Silbrade® reinforced silicone hose offers flexibility for fluid transfer with higher pressure capabilities than unreinforced tubing. Endures temperature variations from 80°F to 350°F (62°C to 176°C) and resists U.V. radiation, ozone and gases. Excellent bend radii for restricted space usage. NSF-51 certified. Made in USA in sizes to 1" O.D. Request a sample. Learn more.

NewAge® Industries, Inc.
