Subject: RRT IV Incident Activation: Methylcyclohexane Methanol Release

Good Afternoon Everyone,

There has been a request for RRT IV activation this afternoon in reference to the

chemical spill that occurred yesterday in West Virginia. The spill has impacted the Elk River in West Virginia which discharges to the Kanawha River, a tributary of the Ohio River. This call is intended to bring us up to speed on the status of the incident and any potential impact to Region 4 waters.

The call will occur at 6pm Eastern Time

Call-in #:
