I spoke to CSB Chair today. On the whole is testimony is OK and acknowledges EPA, OSHA's efforts. He strongly calls on EPA use its CAA authorities to push inherently safer technology and notes that a number of accidents would not have occurred if IST was fully implemented, including the West Virginia spill. He also calls on the federal government to examine the "safety case" based framework used in Europe. We will likely to get questions after the hearing on both.

Mathy:

Enclosed is my written testimony for tomorrow (7 pages). I also have an ORAL that is only 5 minutes. I'll send you both.
