Dr. Lin,
Thank you for the below response.

I have some suggestions about posting the relevant NRDC v. Browner/Jackson, U.S.Dist.Ct. (N.D.Cal.) CV-98-4825 March 23, 1999 (amended) consent decree, and its modifications in 2010, and about the statutory framework regarding it. Please see my attached letter regarding it.

Regards,
JOAN LAVINE in Los Angeles, California, U.S.A.

Ms. Lin and US EPA staff:

Please accept my acknowledgement of the below e-mails this date. Thank you for the information.

On January 25, 2013, at about 11:45 a.m., I filed my originally executed Comment that was due on that date, January 25, 2013, by 5:00 p.m. PST. I hand-delivered it to your offices at 600 Wilshire Blvd., # 1460, Los Angeles, Ca. 90017.

I attempted also to e-mail my comment on January 25, 2013. I was only able to e-mail the body of the comment letter on Jan. 25, 2013, last Friday. The computer file is about 34 MBs and is too big to transmit through the servers of my regular e-mail accounts at AOL and Google.
However, yesterday, Sunday, January 27, 2013, I found an e-mail service call "mail.com" owned by the Associated Press apparently that will transmit e-mailed attachments of up to 50 MB. I opened an account under the email address of JoanTheFoodie@mail.com, and it appeared to transmit. However, I could not tell if your US EPA server accepted it. So please advise whether you received it. It is identical to the hard-copy. If you would prefer, I can ship you a copy of the computer file on a CD.
Thank you.

Ms. Lavine,

I believe your other email could not receive emails from unknown addresses.

Here's what I sent earlier.

Respectfully,

Cindy Lin

Ms Lavine,

Please see my responses in bold below:

Could you give me more detail on the testing over the last year?
You said there have been three tests done over the last year of the Malibu Creek and Malibu Lagoon. Can you tell me when and where they took place, and if you have them, please give me the test results. If they are in your proposal please advise of the page number or whatever other identifying location they are in.

The draft TMDL includes the details of the monitoring data we considered and based our conclusions. I would recommend you look at the document and at Chapters 7, 8, and 9.

Could you please give me the name and contact information for the man in the front row at the 1/14/13, afternoon workshop, who was discussing the sedimentation issues with you?

His name is Brandon Steets with Geosyntec. His number is 805-897-3800.

Also, we have extended the comment period deadline to Friday, January 25.

Respectfully,

Cindy Lin

Ms. Lin,
I have other deadlines and court obligations this week.
Before I have to get out my comments and get them filed on Wed., 1/23/13, I would appreciate getting this information if you have any.

1/18/13 5:20a PST
Ms. Lin,
I have not received a response from you to my e-mail below of 1/16/13. I would like to have this information in order to use it in a comment. Could I hear from you today with whatever information you have available. If you don't have that information, please let me know that.
Thank you for you anticipated cooperation.

1/16/13 8:40a PST
Ms. Lin,

Thank you for holding the TMDL workshop at your US EPA office last Monday afternoon, 1/14/13.

I am the woman at the workshop who asked you about current testing of the Malibu Creek/Malibu Lagoon area. Could you give me more detail on the testing over the last year? You said there have been three tests done over the last year of the Malibu Creek and Malibu Lagoon. Can you tell me when and where they took place, and if you have them, please give me the test results. If they are in your proposal please advise of the page number or whatever other identifying location they are in.

Could you please give me the name and contact information for the man in the front row at the 1/14/13, afternoon workshop, who was discussing the sedimentation issues with you? The beach area near the mouth of the Malibu Creek/Lagoon has been experiencing considerable erosion. It is hypothesized that the loss of beach sand is due to the estuaries that historically supplied the silt and sand now being blocked.

I expect to have some comments for your offices and team by January 23, 2013.
