Or on our website: www.colorado.gov/cdphe/hmwm-stakeholder-processes

Chemical Waste Management, Inc. operated the Denver Arapahoe Chemical Waste Processing Facility from August 1980 through July 1982. A reconstructed disposal cell was created to dispose of hazardous waste and will be governed by this post-closure permit renewal. Waste Management of Colorado, Inc. owns the land and is responsible for the post-closure care of the disposal cell. The first permit was issued in November 1989 to manage waste on the property. The facility has been in post-closure care for approximately twenty years and this permit will be the second time it has been renewed.

The disposal cell has been specifically designed to dispose of hazardous waste in a manner that is protective of human health and the environment. The disposal cell is lined, capped and secured with six foot high chain-link fence, three strands of barbed wire across the top and a locked gate. The post-closure care permit requires monitoring of groundwater, leachate and site security. Every year the facility is required to submit an annual report documenting the results of monitoring events that the Colorado Department of Public Health and Environment reviews.

Inquiries regarding this facility and requests to be put on the mailing list should be directed to:
Jeannine Natterman, Public Involvement Coordinator at 303-692-3303
or by email at jeannine.natterman@state.co.us

Regards,
Jeannine
