Subject: FW: EAS Document Notification

Hey Greg,

Latrice has rejected the RP converting the Lowerline ETO; her comments are below.

Requisition: PR-R6-19-00395
From: Latrice Williams

Attachments/Supporting Documents Need Rework; PO - You, Greg and I need to meet to discuss the IGCE. Please schedule asap.

Rework required for:
1. T&D - IGCE Page 2,
2.
2. Restoration - IGCE Page 2 and Assumptions Tab, This may appear to be inconsistent with the amount of radioactive and hazardous waste removed, but there is also clean overburden that has to be replaced to bring it to grade. But I'm not sure if that is the issue.

3. Excavator - IGCE Page 5, The excavator needed for the removal of the paving was only available at Hertz, although the others could bring it from other offices. The estimate listed is for the needed equipment. The other references are for a smaller unit, with all three sources as a comparison.

4. Single Roller for asphalt compaction - IGCE Page 5, This in on the IGCE twice, in error.

5. 2x2 survey meter - IGCE Page 5, and under the screen shots B140, p111, x114

6. Profile, sampling and processing - Assumptions Tab, this can be removed

When would be a good time to meet? Thanks!

Will LaBombard
