Cathy, Phil,
Attached is my transcription of our interview in New Stuyahok with (b) (6) .
I saw David Wartenbee (KPC bilology prof) who was at a Benthic something or other conference in Rhode Island last week where he was sought out by a regional director for EPA. The director had good things to say about you, Phil, and told Dave he knows of our work, Cathy, and the significance of the cultural component.
I'm meeting with Gary Sonneville this afternoon to incorporate his subsistence data into the synopsis.
Alan
