Tom-
Are you saying there is a sheen emanating from the overflow valve? If yes, it would help if you could send a photograph or video of that sheen.

Heavy rains today. Sheen inside the steel weir at 001, and some sheen outside the weir, inside the soft booms. 001city jpg is the City sanitary overflow, which was contributing to the sheen outside the steel weir.

Diver is tentatively scheduled for Friday the 7th to inspect the 001 Outfall, will confirm by Wednesday.

Sean, we are in receipt of the letter from Commander Merchant.
