LSC Environmental Disaster Solutions
Consultation - Products – Implementation

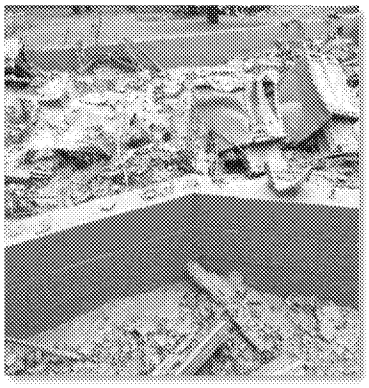
Used extensively on several high-profile environmental sites including –

- Northern California Wildfire 2017
- 9-11 World Trade Center Debris Cleanup
- Alberta Wildfires
- Hanford Nuclear Facility

Public Health and Safety are still at risk in the immediate aftermath:

- Emergency Protective Measure to reduce public health and safety concerns should be immediately implemented
- All stormwater that contacts ash from destroyed structures is polluted with toxic and hazardous materials
- Many pollutants from the ash and dust become airborne
- Cleanup crews are forced to work in the hazardous conditions

Immediate Needs Funding should be used to eliminate these risks.

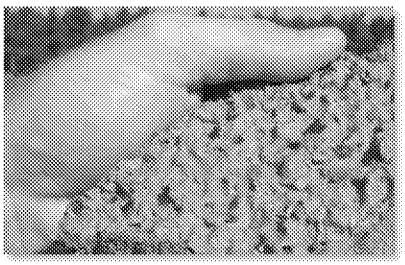


A true best practice:

Rapid…One time…effective preventative solution for Primary Site Containment!

- Eliminates all polluted runoff
- Conforms seamlessly and immediately to any soil, debris or hazardous material
- Applies quickly, up to hundreds of sites per day
- Remains effective for months to years
- Allows for proper and safer clean-up, assessment and restoration

Posi-Shell®
ENVIRONMENTAL COATINGS



Posi-Shell® is easy to remove if further assessment is desired.

Finish the Job

Eliminate sediment pollution with an effective and affordable Secondary Containment!

- Public health and safety are still at risk due to erosion, sediment and ash pollution in stormwater runoff, road closures, and flooding.
- Rains will cause massive sediment and debris pollution.
- Lack of Erosion Control creates a significantly longer and more expensive cleanup process.

EarthGuard® Fiber Matrix solution is the highest performing sediment reduction product on the market – 99.9% Effective

EDGE™ No Water Required – Simply apply on burned areas

- Same EarthGuard® Science…with Mother Nature as the water source
- Cover 50% more with the same budget
- Eliminate massive water weight allows for more watershed protection
- Apply by air, machine, or hand

Unlike the initial disaster…these environmental disasters can be 100% prevented!!!

Task LSC with providing primary and secondary containment solutions in the aftermath of wildfires.
