On August 24, 2015, the Fresno County Agricultural Commissioner's office was notified of a pesticide incident that had occurred on February 10 involving employees of a raisin packing plant. One employee was taken for medical care after she was exposed to the undiluted form of BioSide HS 15%, active ingredient peroxyacetic acid. Six additional employees began to experience symptoms after the disposal of the sanitizer. Symptoms included, peeling skin, eye irritation, shortness of breath, dry/sore throat, headache, vomiting, chills, cramps and sour lips. An enforcement action is pending.
