Ok, I guess I wasn't aware of that. I should have asked for the keys, I fear I wasn't exactly agile climbing the fence.

I asked for a copy of Praxairs as-built drawings. When it arrives, should I send it to John or you?

NuStar has been doing that forever and they always provide us access to their property when we need to sample. They stay on the gravel road. We have (GAF and I/Ashland) keys to the gates.

Hey Carrie, yes they'll begin removing it next week.

One thing I noticed, it seems NuStar is locking the gate near the South Branch Creek so they can drive over the site. Do you know how long that's been going on? I guess I don't have a problem with it if they leave us a key.

Jon,
I visited the site today to look at the interim pipeline area and have spoken to John Hoffman. The hay bales are not a concern and this area of the site appears to have been left in good shape. The only issue is that there are several piles of covered dirt remaining on-site which we assume Praxair will be removing in the near future.
Thanks,
Carrie

John, Carrie Praxair is done with the interim pipeline. I checked it out today, and it looks fine as far as access/egress for is concerned. I thought you might want to take a look before I sign off on anything.

Oh, I asked them to leave the hay bales that they placed near the SBC. If you want them removed, I'll let them know.
